Science Discovers God:

Science Discovers God Olimpia Nera, 2002-06-07 Maybe it's about time we should put together the obvious in the field of science and faith and start walking towards the road of light. If the bible never made sense to you and if science never gave you the answer to the meaning of life, maybe reading this book could take you on a new spiritual journey which is greatly anchored in our science and faith. Scientists claim that the upper limit in human longevity is 120 years. Genesis 6:3 After that Jehovah said, My spirit shall not act toward man indefinitely, in that he is also flesh. Accordingly, his days shall amount to a hundred and twenty years. *Science Discovers God* Ariel Adrean Roth, 2008 Does God exist? Did a Master Designer create our universe or did life spontaneously evolve? Can science retain objectivity in the search for truth while allowing for the possibility that God exists? Does it make any difference? Ariel A. Roth, a scientist and Christian believer, examines key issues related to the God question: the intricate organization of matter in the universe, the precision of the forces of physics, the complexity of the eye and the brain, the elaborate genetic code, the disparity between the fossil record and the vast amount of time necessary for evolution. Faced with so much evidence that seems to require a God in order to explain what we find in nature, why does the scientific community remain silent about God? Hypotheses and speculations that attempt to fit data into a predetermined conclusion abound. What overriding influence prevents scientists from following the data of nature wherever it may lead? *Science Discovers God* Eric A. Folds, 2013-05-01 Dr. Eric A. Folds, Ph.D., takes us on an in-depth adventure into the unseen world of quantum physics in our search to find God. This book probes into how the mysterious phenomenon in quantum physics proves the existence of God. The book also unravels the truth in regards to archaeological, geological, and scientific studies which prove the reality of life after death, heaven, hell, and God. The book also provides an in-depth look into many of the moral issues in our society today and provides the good news. We have here the historical and scientific proof of the resurrection of Jesus from the dead. Eric A. Folds, Ph.D., is the author of *Healing for the Soul: An Enigma Unraveled*. He is also the founder and Pastor of The Christian Church of God, Inc. of Milwaukee, Wisconsin, a tax-exempt 501(c)(3) organization. Eric Folds of Milwaukee is the current CEO and owner of a counseling center and is an Evangelist, first and foremost. He is a graduate of Lighthouse Christian College and of Covenant Theological Seminary. He is married to Kimberly Folds and has two sons, Gabriel Folds and Joshua Folds. *One Truth* Roger Barber, 2018-05-12 The truth of science and the truth of God are never in conflict. When they appear to be, it is due to erroneous science, misinterpreted scripture, or both. William B. Menzies. When I heard this statement some years ago, I realized how clearly it exposes the false choice between science and God. As a Christian and an engineer, I am a student of both, and I freely allow my understanding of one to inform that of the other. Author: The application of modern technology has led to major advances in our understanding of the Universe and the origin and nature of life. In *One Truth*, first-time author Roger Barber brings an engineer's perspective to the discoveries of science. Follow his journey as he surveys the assembly of the Universe from the mother of all Lego sets and then delves into the living

world Scientists have discovered every living cell is operating much like a computer aided manufacturing facility where digital design information is translated to a numerical code which directs machines that produce and assemble the parts of other machines and products They have found numerous complex molecular machines are performing integrated tasks under the control of phenomenal information processing systems in every cell in every living thing on Earth 24 7 The author reviews recent discoveries of science and puts them together to form a picture of the Universe and life that reveals the greatest truth of science How does the truth of this picture interact with the interpretation of Scripture Does it reveal a false choice between the truth of science and the truth of God What does it all mean personally The Humble Approach John Templeton,1981

He is Alive John S. Carpenter,2019-02-08 When science set forth to explain the historical evidence and miraculous events attributed to the existence of Jesus it expected to find hoaxes a lack of evidence and nothing substantial to support a supernatural belief in God What skeptical scientists did discover actually validates the beliefs of Christians And what they could not explain also added even more support for Christian faith The historical accounts eyewitness testimonies and miraculous artifacts provide overwhelming proof that something supernatural and heavenly is in contact with mankind Join John Carpenter a psychiatric therapist on his logical investigation into the divine realm of miraculous evidence through the startled eyes of disbelieving medical and scientific researchers The amazing conclusions from their professional examinations suggest that Jesus Christ must truly be alive and impacting our lives today As with Carpenter s first book Be Not Afraid to Follow the Footprints from Heaven be not afraid of having your current assumptions about God challenged by this historical evidence now under the scrutiny of today s science Open your mind for this fascinating and inspirational journey

Return of the God Hypothesis Stephen C. Meyer, 2021-03-30 The New York Times bestselling author of Darwin's Doubt Stephen Meyer presents groundbreaking scientific evidence of the existence of God based on breakthroughs in physics cosmology and biology Beginning in the late 19th century many intellectuals began to insist that scientific knowledge conflicts with traditional theistic belief that science and belief in God are at war Philosopher of science Stephen Meyer challenges this view by examining three scientific discoveries with decidedly theistic implications Building on the case for the intelligent design of life that he developed in Signature in the Cell and Darwin's Doubt Meyer demonstrates how discoveries in cosmology and physics coupled with those in biology help to establish the identity of the designing intelligence behind life and the universe Meyer argues that theism with its affirmation of a transcendent intelligent and active creator best explains the evidence we have concerning biological and cosmological origins Previously Meyer refrained from attempting to answer questions about who might have designed life Now he provides an evidence based answer to perhaps the ultimate mystery of the universe In so doing he reveals a stunning conclusion the data support not just the existence of an intelligent designer of some kind but the existence of a personal God
