Privately Owned Public Space The New York City Experience:

Privately Owned Public Space Jerold S. Kayden, The New York City Department of City Planning, The Municipal Art Society of New York, 2000-11-10 Hailed by the Wall Street Journal as a juicy little time bomb of a book *Privately Owned Public Space The New York City Experience* examines for the first time New York City's 39 year mixed experience with the production of more than 500 plazas parks and atriums located on private property yet by law accessible to and usable by the public Until now comprehensive systematic knowledge about this vast collection of public spaces has not existed either for experts or members of the public To remedy this gap Harvard University professor Jerold S Kayden The New York City Department of City Planning and The Municipal Art Society of New York have joined forces to research and write *Privately Owned Public Space The New York City Experience* Through words photographs scaled site plans maps and analysis of newly assembled data they examine history law design and use of the city's privately owned public spaces Each of the more than 500 spaces is individually discussed to provide far reaching comparative information about this unique category of public space In reading this book designers planners lawyers and academics will gain greater understanding about the possibilities and problems inherent in the design management and enforcement of privately owned public space Public officials private owners and civic group representatives will learn more about their roles in ensuring public access and vitality of such spaces Individuals will discover where New York City's public spaces are located and what amenities they offer Everyone will comprehend more completely the contribution that privately owned public space can make toward open and attractive cities in which all individuals have access to a diversity of public places

Mending Privately Owned Public Spaces Adriana Cobo Corey, 2025-12-02 This book is motivated by a simple observation Privately Owned Public Spaces or POPS are overlooked sites when it comes to exploring the subject of taste in architecture and urban design The book unpacks the intricate world that unfolds from this thought while arguing that taste is a missing key in current spatial practice discourse Successful POPS are often presented as desirable additions to urban redevelopment projects in cities across the world This perception often overshadows and sometimes dismisses some of the more damaging impacts that the establishment of POPS has on the social tissue of specific localities and social groups and more generally on the socio political dynamics of cities Within the fields of architecture and urban design high regard for specific urban regeneration projects with POPS at their heart tends to ignore their inherently divisive social impact This in turn strengthens an often legitimised belief that analysing questioning and re aligning such impact falls outside the realm of these professions This book explores how successful POPS are sustained through among other maintenance practices carefully managed aesthetic codes largely dependent on showcasing the aesthetic value of highly controlled programmes of use This specific practice turns POPS into revealing sites when it comes to exploring taste in the context of spatial practice Why don't we talk about taste in socially engaged practice today Does a focus on aesthetics pose an ethical dilemma between superficiality and depth for practitioners in the face of
