Privatization And Deregulation In Global Perspective:

Privatization and Deregulation in Global Perspective Dennis J. Gayle, Jonathan N. Goodrich, 1990-07-19 An illuminating introductory essay by the editors and an excellent bibliography are the highlights of this compendium of articles on privatization Public and academic library collections community college through upper division Choice Privatization and Deregulation in Global Perspective Dennis J. Gayle, Jonathan N. Goodrich, 1990 In this volume the leading scholars and practitioners in the field provide a comprehensive in depth examination of trends in privatization throughout the world Focusing primarily on the experiences of seventeen countries including developing countries advanced industrial nations and socialist states the book explores theoretical approaches toward the issues inherent in privatization and deregulation specifies techniques for successful privatization and examines the cost benefits and limits of privatization policies The contributors then present a series of twenty detailed case studies which assess the actual problems and prospects associated with privatization and deregulation policy choices across varied sociopolitical systems and a range of economic sectors The result is the most extensive comparative public policy analysis yet published on the subject of privatization and deregulation Following an introductory overview which addresses the interaction between privatization deregulation and market liberalization within both developed and developing country policy environments the contributors discuss the philosophical bases of privatization policies examine the seminal experiences of Britain and the United States and identify factors responsible for successful privatization efforts This is followed by case studies of privatization in such sectors as finance transportation health care housing and telecommunications around the world After special sectoral studies of developing country finance debt equity conversions and international air transport the authors successively survey the experience of privatization in selected Latin American Caribbean West African and Asian developing nations in the advanced industrial nations of Canada France New Zealand and Sweden and in the socialist countries of China Hungary and Poland In their conclusion the editors discuss the immediate implications of the contributors findings and suggest research directions for the future Numerous explanatory tables and figures are included making this an ideal supplemental text for courses in business government and public policy PRIVATIZATION and deregulation in global perspectives Dennis J. Gayle, Jonathan N. Goodrich, 1990 *Legal Aspects of Privatisation* Bulent Seven, 2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise

state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades

International Development Governance Ahmed Shafiqul Huque, Habib Zafarullah, 2017-09-25 The establishment of good governance is a major challenge for the developing world along with the need to sustain the progress resulting from developmental efforts Although there are numerous studies on the development and governance of emerging nations few volumes make a serious effort to bring together these two critical concepts International Development Governance combines the two concepts development and governance by examining the issues and problems faced by nations in their attempts to establish sustainable governance This textbook also initiates discussions on the concept of development governance in an international context The book fills the gap in existing literature by drawing upon the experience and expertise of scholars from a broad spectrum of knowledge Their views explain the issues and problems with reference to a number of tools that could establish development governance and sustain it The text offers in depth examinations of developmental sectors resulting in a textbook that will inspire future public officials policy makers and consultants to contribute to the betterment of life for citizens of developing countries **Black Theology--Essays on Global Perspectives** Dwight N.

Hopkins, 2017-06-15 Since its start in 1966 black liberation theology in the United States has continually engaged international developments with Africa and the entire world But after Nelson Mandela was released from prison in February 1990 there has been an almost twenty year break in books on black theology and international affairs Black Theology Essays on Global Perspectives bridges that post 1990 gap and makes a vital contact with Africa again This book conceptualizes black theology to take on the global reconfigurations and opportunities brought about by the rapidly shrinking earth of fast paced worldwide contacts In other words in the specificity of the genealogy of black theology we need to reforge ties with Africa This claim is based on tradition And in the generality of the larger worldwide intertwining of technologies and economics we need a new type of black theological leadership for the twenty first century This claim is based on today's international challenges The essays in this book draw on tradition and point forward in the midst of today's worldwide challenges and favorable possibilities given the closeness of all nations and the varieties of cultures **Marketization in ASEAN** C. Y.

Ng,Norbert Wagner,1991 How can public enterprises be made more efficient Where should the line between public and private production be drawn What can countries do to minimize the losses sustained by public enterprises What is the current perception of the role of the state in production in Southeast Asia and particularly in ASEAN What are the political legal and administrative constraints pertaining to the divestment and or marketization of public enterprises Is the situation in Southeast Asia different from that in Europe These are some of the questions this volume tackles **Privatisation** V.
