Privatizing Transportation Systems Bloomsbury Publishing, 1996-11-25 Privatization began in the 1970s with Carter's deregulation of some business and increased with the Thatcher administration in the United Kingdom the Reagan administration in the United States and many communist and socialist countries One area of concern in privatization is transportation airports water ports roads and mass transit Privatization can be implemented in financing construction operation and maintenance of the transportation system the main motives being the belief that the private sector can be more efficient than the public sector and because public funds are becoming less plentiful for a variety of reasons The focus is on ideas and innovations for expanding the private role in transportation Specifically covered are ideas and innovations for expanding the role of private sector in U S transportation projects private financing of urban transportation airport privatization water port improvement toll roads and competitive contracting for transit services The distinguished list of contributors includes the co recipient of the 1996 Nobel Prize in Economics William Vickrey The audience for the work are scholars dealing with the discussions concerning the economics and politics of privatization business people who are likely to be interested in potential opportunities governmental regulators and staff and policy makers *Privatization and Regulation of Transport Infrastructure* Antonio Estache, Ginés de Rus, 2000-01-01 The 1990s saw an increase in the liberalisation of transport policies and a strengthening of the role of private operators and investors in transport infrastructure worldwide The search for sustained improvement in efficiency is probably secondary to the need to find additional financing but it is improvement in services that is at the core of the new role of the government in transport Governments must now become fair economic regulators of many of the privately operated transport services and infrastructures This book examines the major challenges that governments are likely to face in taking on their new role in transport Privatization of Roads and Highways: Human and Economic Factors, The Walter E. Public Sector Privatization Lawrence K. Finley,1989-09-26 When government services are turned over to profit making corporations will a gentler kinder America result Significantly when the issue of privatization of government arises this question usually takes a back seat to the more narrowly focused one of can the taxpayer pay less for the same service without diminishing existing quality This book compiles experiences of practitioners and corporations with generally positive experiences in contracting for services between public and private entities The essays by professors raise serious questions that all societies will face in creating an appropriate mix so that their citizens enjoy gentler kinder lives Growth and Change For many cities and states faced with reductions in federal revenue sharing and little political support for increased taxes privatization of the public sector seems the only viable alternative In an effort to maintain existing service levels with decreased funds many governments have turned to alternative service delivery approaches through such mechanisms as

contracting franchises subsidies and voucher plans In this volume Finley and a distinguished group of contributors from city governments corporations and universities offer a comprehensive overview of privatization in practice Their papers address privatization in a number of areas including transportation fire protection health care and environmental services as well as the legal aspects of privatization An especially stimulating chapter describes major European efforts at privatization Divided into three major sections the book begins with introductory chapters that examine the dimensions of public services evaluate recent changes in the public private mix and explore alternative delivery methods Part Two focuses on alternate services experiences of governments and companies including topics on environmental infrastructure alternatives alternative means of highway development private fire contractor operations and alternative health care delivery The final section addresses both constraints to privatization and the opportunities presented by various alternative delivery mechanisms Here the contributors address the legal liabilities of governments involved in contracting out the financial responsibilities of the contracting entities and government financing of facilities through bonds A chapter by the editor recommends a process by which business persons can begin to successfully compete with public deliverers while the final chapter offers new insights into the ways in which various European countries have handled the issue of privatization Policymakers and public sector executives will find these essays enlightening and provocative
