

Epistemology

- The study of *knowledge* (Greek: episteme)
- What is it to know something, what do we know, how do we know it, etc.
- Knowing that vs. knowing how vs. knowing:
 - Traditionally, the focus has been on knowing that P, where P is some declarative sentence.

Problem Of The Criterion Studies In Epistemology Cognitive Theory:

The Problem of the Criterion Robert P. Amico,1993 This work is a full scale historical and analytical study of the problem of criterion The author devotes six chapters to this problem tracing its history from the ancient sceptic Sextus Empiricus and following its path to Michel de Montaigne Cardinal D J Mercier Nicholas Rescher and Roderick Chisolm The work argues that Sextus ancient problem is different from its modern characterisation and it also offers a dissolution to both problems and a critique of meta epistemological scepticism He shows that the influential views of Rescher and Chisolm are unable to handle the problem adequately

Epistemological Theory in Classical Chinese Philosophy Jana S. Rošker,2024-11-26 This book offers a profound exploration of the epistemological frameworks that have influenced Chinese intellectual history from ancient times through the Song Dynasty s Neo Confucianism It provides a nuanced analysis of how knowledge systems within Chinese culture developed and interacted with each other across different historical epochs By examining classical texts and philosophical movements Ro ker brings to light the unique approaches to knowledge and understanding in the Chinese tradition setting them against the backdrop of Western epistemological thought Translated by Marko Ogrizek the book serves as a vital resource for anyone keen to understand the dynamic interplay of ideas that bridge the East and West linking ancient wisdom with modern perspectives

Explanatory Solutions to Skeptical Problems Kevin McCain,2025-01-12 Phenomenal Explanationism is a powerful new theory of epistemic justification that combines an explanationist conception of evidential support with an appearance based or phenomenal conception of evidence According to PE epistemic justification is a matter of what best explains our evidence which ultimately consists of appearances It is a complete internalist theory of epistemic justification that delivers on the promises of other appearance based theories while avoiding their pitfalls In *Explanatory Solutions to Skeptical Problems* Kevin McCain expands his previous work on the internalist dimension of the theory to cover external world skepticism He also demonstrates how PE offers solutions to a host of other perennial skeptical problems including the problem of the criterion the regress of justification memory skepticism and inductive skepticism The promise that PE displays in responding to these problems makes it plain that it is a viable conception of epistemic justification worthy of careful consideration and also that accepting internalism more generally doesn t leave one without reasonable responses to skeptical problems

The MIT Encyclopedia of the Cognitive Sciences (MITECS) Robert A. Wilson, Frank C. Keil,2001-09-04 Since the 1970s the cognitive sciences have offered multidisciplinary ways of understanding the mind and

cognition The MIT Encyclopedia of the Cognitive Sciences MITECS is a landmark comprehensive reference work that represents the methodological and theoretical diversity of this changing field At the core of the encyclopedia are 471 concise entries from Acquisition and Adaptationism to Wundt and X bar Theory Each article written by a leading researcher in the field provides an accessible introduction to an important concept in the cognitive sciences as well as references or further readings Six extended essays which collectively serve as a roadmap to the articles provide overviews of each of six major areas of cognitive science Philosophy Psychology Neurosciences Computational Intelligence Linguistics and Language and Culture Cognition and Evolution For both students and researchers MITECS will be an indispensable guide to the current state of the cognitive sciences Second Handbook of Research on Mathematics Teaching and Learning Frank K. Lester, 2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community s willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community **The Nature of Meaningfulness** Robert K. Shupe, 1999 Shupe presents a unified perspective on meaningfulness spanning such varied topics as the meaningfulness of linguistic expressions and conventional signs Freud s conception of the meaningfulness of various mental phenomena and instances of behavior a person s meaning to do something meaning in the arts and even life s having a meaning Shupe s perspective is based upon a constitutive analysis of what it is for one item to represent another Criticizing the views of philosophers who attempt to analyze such representing in causal terms or merely in epistemological terms he shows that a successful analysis needs to invoke both types of considerations *Illusions of Paradox* Richmond Campbell, 1998 Campbell philosophy Dalhousie U Halifax argues that feminist and naturalized epistemology are not incompatible despite appearances and that combining them allows a coherent and politically useful account of the objectivity of value He draws on conceptual resources already present in the two approaches to construct a coherent epistemology that reinforces and extends the present feminist critiques of androcentric science and the fact value dichotomy but is uncompromising in its realist implications Annotation copyrighted by Book News Inc Portland OR *Soviet Studies in Philosophy* , 1968 *The Philosopher's Index* , 2008 Vols for
