## **Problem Of The Soul Two Visions Of Mind And How To Reconcile Them:**

**The Problem Of The Soul** Owen Flanagan, 2008-08-05 Science has always created problems for traditional ways of seeing things but now the very attributes that make us human free will the permanence of personal identity the existence of the soul are threatened by the science of the mind If the mind is the brain and therefore a physical object subject to deterministic laws how can we have free will If most of our thoughts and impulses are unconscious how can we be morally responsible for what we do If brains and bodies undergo relentless change how can our identities be constant The Problem of the Soul shows the way out of these paradoxes Framing the conflict in terms of two dominant visions of the mind the manifest image of humanistic philosophy and theology and the scientific image Owen Flanagan demonstrates that there is common ground and that we need not give up our ideas of moral responsibility and personal freedom in order to have an empirically sound view of the human mind This is a profoundly relevant work of philosophy for the common reader

**The New Cosmic Story** John F. Haught, 2017-10-24 A Choice Outstanding Academic Title A compelling argument for a broader understanding of religion in relation to our cosmic story Mary Evelyn Tucker coauthor of *Journey of the Universe* Over the past two centuries scientific advances have made it clear that the universe is a story still unfolding In this thought provoking book John F Haught considers the deeper implications of this discovery He contends that many others who have written books on life and the universe including Stephen Hawking Stephen Jay Gould and Richard Dawkins have overlooked a crucial aspect of cosmic history the drama of life s awakening to interiority and religious awareness Science may illuminate the outside story of the universe but a full telling of the cosmic story cannot ignore the inside development that interiority represents Haught addresses two primary questions what does the arrival of religion tell us about the universe and what does our understanding of the cosmos as an unfinished drama tell us about religion The history of religion may be ambiguous and sometimes even barbarous he asserts but its role in the story of cosmic emergence and awakening must be taken into account A well written book overall and one that should prompt a more inspiring view of where we are in the Big Picture The New Cosmic Story is highly recommended Forbes.com Haught delivers a singular contribution with his fresh panoptic perspective on our cosmic story Charles G Conway Reading Religion This book John F Haught s summa will become a permanent contribution to the religion and science literature Holmes Rolston III Templeton Prize winner

*A Philosophy of the Christian Religion* Nancey

Murphy,2018-07-19 A Philosophy of the Christian Religion offers a new kind of introduction to the subject Whereas most introductions in the past have attempted to deal with religion in general this book focuses on philosophical issues of special importance to Christianity In doing this Nancey Murphy also takes full account of how conceptual revolutions in philosophy now mean that what older introductions termed standard problems have changed from the way they were dealt with in earlier eras At the same time this new introduction helps the reader to better understand how contemporary issues have come to take on their current force by placing them within the context of the most sophisticated account available of human reason Alasdair MacIntyre s tradition constituted rationality Contents Part One A Brief History of Reason 1 Ancient and Medieval Ways of Knowing the Divine 2 Modern Epistemology and the Possibility of Theology 3 Faith in Late Modern Reasoning 4 Faith and Reason for the Twenty First Century Part Two Crises in Modern Christianity 5 Three Epistemological Crises for Christianity in Modernity 6 The Problem of Special Divine Action 7 Modern Problems of Evil and Suffering 8 Science and Christianity 9 Christian Anthropology Philosophy and Science 10 The Development of Modern Naturalism

Green,2008 Are humans composed of a material body and an immaterial soul This view is commonly held by Christians yet it has been undermined by recent developments in neuroscience How much of Christian theology is built on views of humanity that modern science has proved to be untenable Exploring what Scripture and theology teach about issues such as being in the divine image the importance of community sin free will salvation and the afterlife Joel Green argues that a dualistic view of the human person is inconsistent with both science and Scripture Publisher description of OCLC      **Psychology's Interpretive Turn** Barbara S. Held,2007 Two of the most fundamental and pervasive philosophical questions in psychology are Is objective psychological truth possible and how does that possibility pertain to human agency or our capacity for self determination For over 25 years postmodern theorists have maintained that an antiobjectivist or antirealist philosophy enhances human agency by making us free to be what we interpret ourselves to be However in the last decade a new wave group of theorists with hermeneutic pragmatic and constructionist origins has put forth views that are replacing those of conventional postmodernists Their dual mission is to defend the realism denied by postmodern antirealist psychologists while upholding the agency they believe to be denied by modern objectivist psychologists      Emergent Freedom James W. Haag,2008 Emergentism as a metaphysical option between Reductive Physicalism and Substance Dualism provides a space for free will to be both experientially balanced and evidentially accurate By expanding notions of causation and adopting a process ontology Emergentism reevaluates age old commitments to human free will With Emergentism James W Haag believes Philip Hefner s model of human being the created co creator to be a valuable place to look for dialogue Hefner s claim that the created co creator is simultaneously constrained and free fits securely with Dynamic Theological Naturalism and its acceptance of Emergentism      **Linnaeus and Homo Religiosus** Carl Reinhold Bråkenhielm,2009 Are we by nature religious and how should we then understand Homo Modernus the modern man who seems to lack religious awareness What are the biological roots of religion and the genetic basis for religious experience How can we relate contemporary biological and theological theories of human nature to one another These questions were the background of a conference arranged by the Faculty of Theology at Uppsala University on the 30th of May to the 2nd of June 2007 The conference was a part of the celebration of the 300th anniversary of the birth of Carl von Linn The theme of the conference was Linnaeus and Homo Religiosus Historical and Contemporary Perspectives on the Biological Roots of Religious Awareness and Human Identity This volume contains most of the lectures and papers from this conference Publisher s description      **Levinas Studies** ,2009      **The Biology of Religious Behavior** Jay R. Feierman,2009-06-08 This title offers a fresh and detailed take on the evolution of religious behavior from a biobehavioral perspective promoting a new understanding that may help build bridges across the religious divide Religious conflict and divisiveness have been important themes in human history and their effects

are no less evident today The scientific study of religion cannot by itself mend these divisions but by enhancing our understanding of behavior it can make an important contribution towards that end There has been much recent interest in the study of religion from the perspective of Darwinian evolution The Biology of Religious Behavior The Evolutionary Origins of Faith and Religion offers a broad overview of the topic written by internationally recognized experts In addition to its primary focus on religious behavior the book addresses other important aspects of religion such as values beliefs and emotions as they affect behavior The contributors approach the evolution of religion by examining the behavior of individuals in their everyday lives After describing various religious behaviors the contributors consider the behaviors with reference to their evolutionary history development during the lifetime of the individual proximate causes and adaptive value Happily this foray into understanding religion from a biobehavioral perspective demonstrates that at the biological and behavioral levels what unites the different religions of the world is far greater than what divides them This title attempts to explain the link between biology and religious behavior It takes a multidisciplinary approach offering new insights into religious beliefs and behavior that may help bridge religious divisions It demonstrates that religious belief and behavior have evolved in a similar fashion for all religions It provides a means of understanding how religion could have evolved spread and become what it is today from [www.amazon.co.uk](http://www.amazon.co.uk) Nov 25 2010      **On Reason** Emmanuel Chukwudi Eze, 2008-07-04 A philosophical argument that rationality is based on or produced from difference and is not only worth retaining but necessary in a culturally diverse world
