 motivated learners is a daily challenge But with the process of problem based learning PBL any teacher can create an
 exciting active classroom where students themselves eagerly build problem solving skills while learning the content
 necessary to apply them With problem based learning students work begins with an ill defined problem Key to this problem is
 how it explicitly links something important in students daily lives to the classroom This motivational feature is vital as
 students define the what where and how of resolving the problem situation Problem based learning may sound potentially
 chaotic and haphazard but it rests on the firm foundation of a teacher s work behind the scenes The teacher develops a
 problem long before students see it specifically choosing the skills and content the problem will emphasize and matching
 those to curriculum and standards Though a PBL problem will have no right answer the teacher structures the experience so
 that specific learning takes place as students generate the problem solving steps research issues and produce a final product
