Problems In Insurance Law

Huangqi Zhang

Problems In Insurance Law:

Current Issues in Insurance Law, 1983 **The Insurance Law Journal**, 1898 Illegality in Marine Insurance Law

Feng Wang, 2016-09-13 *Illegality in Marine Insurance Law* is the first book to deal specifically with illegality in the context of marine insurance law. Previously this issue has only ever been partially covered within analysis and criticism of Section 41 of the Marine Insurance Act 1906 and warranties. However Dr Wang Feng goes much further than this by considering its impact on the common law relevant to marine insurance in many jurisdictions worldwide. The book addresses whether the existing law represents an accurate codification of the former authorities and whether Section 41 truly reflects existing legal principles. As well as this, the book examines how correctly to approach illegality within the context of marine insurance, considering the fundamental changes to the rule of breach of warranty introduced by the Insurance Act 2015. Of interest to academic researchers and practitioners in common law and civil law jurisdictions, this book provides rigorous analysis of the illegality issue and a conceptual approach for various approaches to reform marine insurance law. It is a unique and comprehensive guide to illegality in marine insurance law. *Data Profiling and Insurance Law* Brendan McGurk

KC, 2019-03-21 The winner of the 2020 British Insurance Law Association Book Prize, this timely expertly written book looks at the legal impact that the use of Big Data will have on the provision and substantive law of insurance. Insurance companies are set to become some of the biggest consumers of big data, which will enable them to profile prospective individual insureds at an increasingly granular level. More particularly, the book explores how i) insurers gain access to information relevant to assessing risk and/or the pricing of premiums; ii) the impact which that increased information will have on substantive insurance law and in particular duties of good faith, disclosure and fair presentation of risk; and iii) the impact that insurers' new knowledge may have on individual and group access to insurance. This raises several consequential legal questions: i) To what extent is the use of big data analytics to profile risk compatible at least in the EU with the General Data Protection Regulation? ii) Does insurers' ability to parse vast quantities of individual data about insureds invert the information asymmetry that has historically existed between insured and insurer, such as to breathe life into insurers' duty of good faith disclosure? And iii) by what means might legal challenges be brought against insurers both in relation to the use of big data and the consequences it may have on access to cover? Written by a leading expert in the field, this book will both stimulate further debate and operate as a reference text for academics and practitioners who are faced with emerging legal problems arising from the increasing opportunities that big data offers to the insurance industry. **Private Law in the 21st**

Century Kit Barker, Karen Fairweather, Ross Grantham, 2017-01-26 This book brings together a wide range of contributors from across the common law world to identify and debate the principal moral and systemic challenges facing private law in the remaining part of the twenty-first century. The various contributions identify serious problems relating to complexity and overload, threats to research and education, the law's unintelligibility, the unsatisfactory nature of the law reform process and

a general lack of public engagement They consider the respective future roles of statutes codes and judge made law in the form of both common law and equitable rules They consider how best to organise the private law system internally and how to co ordinate it externally with other public and economic systems human rights regulation insurance markets and social security frameworks They address the challenges for private law presented by new forms of technology and by modern demands for the protection of new and intangible forms of moral interest such as interests in privacy vindication and personal choice They also engage with the critical contemporary debates about access to and the privatisation of civil justice The work is designed as a source of inspiration and reference for private lawyers as well as legislators policy makers and students

Commerce Reports United States. Bureau of Foreign and Domestic Commerce,1931 **Insurance Law** ,2004

A Commentary on the Law of Evidence in Civil Issues Francis Wharton,1879 *Daily Consular and Trade Reports* ,1931

Legal Issues of European Integration ,1991 **Special Problems in Insurance Law** Legal Education Society of Alberta,1978 Insurance Law and Practice, with Forms John Alan Appleman,1941 *Cases and Problems on Contracts* John D. Calamari,Joseph M. Perillo,Helen Hadjiyannakis Bender,1989 **Space Insurance: International Legal Aspects** Katarzyna Malinowska,2017-03-15 Insurance related to outer space activities has been around since the 1960s but has become vastly more significant with the increased commercial use of satellites This book focuses on the legal aspects of space insurance in the contractual context analysing space risk as well as the insurance terms used on the market It offers the first in depth coverage both practical and theoretical of space insurance from an international law perspective Attending throughout to the important and problematic distinction between the space segment upstream and ground segment downstream in space law this book deals comprehensively with such issues and topics as the following the main hazards relating to space activities the impact of new space technologies on the level of risk and insurance the differing types of risks attributable to various entities in the context of insurable interest aspects of the space risk allocation regimes and risk assessment the impact of the five space treaties the Outer Space Treaty the Liability Convention the Rescue Agreement the Registration Convention and the Moon Agreement on the subject and scope of insurance coverage the advent of suborbital flight commercial human space flight and space tourism in the context of emerging insurance risks the problem of space debris contractual aspects of space activities affecting the space insurance risks basic notions such as outer space space object in the context of space activities and related insurance coverage basic insurance principles and their operation in the space insurance and the adjustment of losses and the settlement of disputes in space insurance The author emphasises the need to understand the various insurance risks facing particular types of commercial space activities including pre launch launch transportation spaceflight satellite communications satellite navigation satellite remote sensing and space station operation Satellites are increasingly a vital part of many daily activities of contemporary society and the Earth s orbit is becoming ever more crowded heightening the risks of collision damage and claims This thoroughly researched book will

therefore be extremely useful to lawyers policymakers and academics tasked with defining the scope of insurance coverage that accurately mirrors technological contractual and legal reality Its practical aspect will be of extraordinary value to insurance lawyers underwriters and brokers Quarterly Journal United States.
