Problems of the Future and Essays Samuel Laing, 1894
Laing, 2018-07-10 **How to Write Better Essays** Bryan Greetham, 2022-12-15 For every student who needs to write essays from whatever discipline this book is an essential resource offering the help and inspiration they need to tackle their essays with confidence This book takes the reader carefully through each landmark stage of the essay writing process from the interpretation of the question to the research planning and revision They are shown not just how to improve their study skills such as note taking reading organisation and writing but their thinking skills too Full of techniques and worked examples this bestselling guide teaches students how to analyse difficult concepts criticise and evaluate arguments use evidence and develop more ideas of their own It provides clear and practical advice throughout and gives students the confidence they need to tackle written assignments New for this edition The fifth edition includes a new chapter on staying focused and managing distractions It also features new techniques for reading sources that will help you form your own judgements and craft strong and original arguments **Demystifying Academic Writing in Higher Education: A Process View on Academic Textual Production** Xinghua Liu, Rui Alexandre Alves, Angelique Aitken , Josef Schmied, 2025-10-30 Academic writing in this Research Topic refers to the type of writing demonstrating students disciplinary knowledge of and proficiency in synthesizing analyzing and responding critically to new information Hyland 2004 Swales 1990 which may include those genres like course essays project reports research proposals lab notes journal articles conference paper theses and dissertations As the current workplaces have become increasingly specialized higher education worldwide has been increasingly charged with the task of developing students academic writing and correspondingly on students parts learning through writing has been necessary for them to succeed in higher education To prepare university students for writing challenges during the past decades numerous studies have been devoted to the study of linguistic and rhetorical resources in students academic writing under such umbrella terms like style reader awareness authorial voice writers identity stance evaluation textual structures steps and moves Charles Hunston Hinkel 2002 However previous research on academic writing has been predominantly focused on the linguistic and rhetorical aspects namely the final product of students writing while the nature and processes of composition students engagement and individual differences and the influence of contextual factors like emerging technology have been under explored Thus the goal of this Research Topic is to bring a process oriented and dynamic perspective to the study of textual production in academic contexts by both encouraging an expanded view of existing research paradigms and also welcoming novel approaches Data can be collected by using corpus building interviews and questionnaires but we would also welcome the use of experimental methods and a mixed method approach for data collection Meanwhile previous research mainly studied university students who were learning English as a second or foreign language hence we also welcome research examining first language writers and

students who are learning a second or foreign language other than English We believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction 5 Student writers textual production peer feedback and interactions with discourse communities 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education

Problems of the Future and Essays (Classic Reprint) Samuel Laing, 2017-12-22 Excerpt from Problems of the Future and Essays So it is with modern science For centuries it had to grope its way through dense jungles of superstitious ignorance where misty shapes of theological and metaphysical speculation obscured the real facts of the universe or were mistaken for them At length and comparatively quite recently the human intellect emerged into the light of day and gaining the first heights began to acquire accurate ideas of the true laws and constitution of the universe The progress once begun went on at an accelerated rate until in the last half century it has carried with it in an impetuous torrent Old creeds and cherished convictions like so much drift wood floating on the surface of Lake Erie when caught by the current which hurries it down the Falls of Niagara About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

stage to successfully complete each component until the paper is finished Practical summaries recipes for success worksheets exercises and a series of handy checklists make this a must have supplement for any writing intensive political science course New to the Fourth Edition A non causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process Updated and more detailed discussions of plagiarism paraphrases drop ins and transcripts help to prevent students from misusing sources in a constantly changing digital age A more detailed discussion of fake news and disinformation shows students how to evaluate and choose high quality sources as well as how to protect oneself from being fooled by bad sources Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom at a conference and beyond A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it
