winner Dr Sarah Parcak gives readers a personal tour of the evolution, major discoveries and future potential of the young
field of satellite archaeology. From surprise advancements after the declassification of spy photography to a new map of the
mythical Egyptian city of Tanis, she shares her field's biggest discoveries, revealing why space archaeology is not only exciting
but urgently essential to the preservation of the world's ancient treasures. Parcak has worked in twelve countries and four
continents using multispectral and high-resolution satellite imagery to identify thousands of previously unknown settlements,
roads, fortresses, palaces, tombs, and even potential pyramids. From there, her stories take us back in time and across borders
into the day-to-day lives of ancient humans whose traits and genes we share. And she shows us that if we heed the lessons of
the past, we can shape a vibrant future. Includes illustrations. A renowned space archaeologist gives readers an insider's look
at her field, which is basically Indiana Jones meets cutting-edge satellite technology. Kirkus Reviews starred review. This is a
fascinating glimpse into a young field just as its technological possibilities are exploding. Nature *Thebanische
