Problems In Historical Epistemology:

Problems in Historical Epistemology Jerzy Kmita, 1988 *Problems in Historical Epistemology* Jerzy Kmita, Michael Turner, 1988-10-31 **Handbuch Wissenschaftsgeschichte** Marianne Sommer, Staffan Müller-Wille, Carsten Reinhardt, 2017-03-29 Wie sind die Wissenschaften entstanden Wie haben sie sich entwickelt Wissenschaftsgeschichte hat als Disziplin eine ebenso lange und bewegte Geschichte wie die wissenschaftliche Arbeit selbst Das Handbuch gibt einen umfassenden Überblick über die historische und aktuelle Wissenschaftsgeschichte in ihrer Anwendung auf alle Wissenschaftszweige stellt die unterschiedlichen Forschungsansätze vor und führt in die Globalgeschichte der Wissenschaften ein Betrachtet werden dabei Räume und Epochen Orte der Wissensproduktion Wissenschaft und die Geschichte der modernen Welt **Perspektiven der Philosophie**, 2021-11-15 When Historiography Met Epistemology Stefano Bordon, 2017-03-06 In *When Historiography Met Epistemology* Stefano Bordon shows the emergence of sophisticated histories and philosophies of science in French speaking countries in the second half of the nineteenth century That process involved mathematicians scientists and philosophers and was deeply linked to other processes that transformed the cultural and material landscape of Europe In the literature the emergence of the history and philosophy of science is chronologically associated with the turn of the twentieth century the author points out that this meaningful starting point should be moved backwards Since the 1860s sophisticated histories of science and critical meta theoretical remarks on scientific practice began to compete with naive historical reconstructions and dogmatic views on science **Handbook for the Historiography of Science** Mauro L. Condé, Marlon Salomon, 2023-09-30 This book aims to perform a critical and broad assessment of the historiography of science produced from the late nineteenth century to the early twenty first century It presents its main authors concepts ideas conceptions and schools It also analyzes the historical circumstances of the rise of the discipline history of science and the relations of the historiography of science with related areas These chapters do not understand the historiography of science as a mere description or record of the history of science Instead they understand the historiography of science from the epistemological criteria and choices that guided the writing of the history of science in its different contexts In other words more than describing the record of the various possibilities of historiographical approaches to science the chapters carry out an epistemological reflection to assess the bases possibilities scope and limits of different historiographical conceptions authors and traditions that have established the writing of the history of science This book can be conceived as a reference work not only for professional historians and philosophers but also for academics from different backgrounds who are initiating themselves in the universe of history and philosophy of science be they scientists from different fields or young researchers from different backgrounds who want to start studying the history and philosophy of science The Problem of Disenchantment Egil Asprem, 2014-07-10 *The Problem of Disenchantment* offers a comprehensive and interdisciplinary approach to the intellectual history of science religion and the occult in the early 20th

century By developing a new approach to Max Weber's famous idea of a disenchantment of the world and drawing on an impressively diverse set of sources Egil Asprem opens up a broad field of inquiry that connects the histories of science religion philosophy and Western esotericism Parapsychology occultism and the modern natural sciences are usually viewed as distinct cultural phenomena with highly variable intellectual credentials In spite of this view Asprem demonstrates that all three have met with similar intellectual problems related to the intelligibility of nature the relation of facts to values and the dynamic of immanence and transcendence and solved them in comparable terms **Epistemology and History**

,2023-08-14 Normative Economics in the History of Economic Thought Sina Badiei,2024-06-21 This book examines the role of normative economics in the writings of Karl Marx Ludwig von Mises Milton Friedman and Karl Popper The book shows that while distinguishing positive from normative economics can be helpful this distinction should not minimize the importance of normative economics or reject the possibility of offering objective evaluations of social phenomena and policies in normative economics The book offers a critical assessment of the attempts by Marx Mises and Friedman to reduce scientific economics to the positive analysis of social phenomena alone Through a meticulous analysis of their work the book shows that their positive theories fail to justify their evaluations of economic phenomena and policies The book then draws on the writings of Popper to maintain that we should place normative economics at the center of economics The book argues that normative economics can choose the norms underlying its evaluations of social situations and policies objectively and relies on some of Popper's ideas to offer some criteria that can facilitate the selection of these norms The book will be of interest to economists historians of economic thought philosophers of economics and political theorists and philosophers

The Problem of Knowledge in Late Antiquity Center for Hermeneutical Studies in Hellenistic and Modern Culture,1978

Political Epistemology Pietro Daniel Omodeo,2019-10-14 This book is an investigation of the ideological dimensions of the disciplinary discourses on science in line with the scholarly tradition of historical epistemology It offers a programmatic treatment of the political epistemological problematic along three entangled lines of inquiry socio historical epistemological and historiographical The book aims for a meta level integration of the existing scholarship on the social and cultural history of science in order to consider the ways in which struggles for hegemony have constantly informed scientific discourses This problematic is of primary relevance for scholars in Science Studies philosophers historians and sociologists of science but would also be relevant for anybody interested in scientific culture and political theory *Reconsidering Historical Epistemology* Matteo Vagelli,2024-06-27 This book explores the key conceptual stakes underpinning historical epistemology The strong Anglophone interest in historical epistemology since at least the 1990s is typically attributed to its simultaneously philosophical and historical synthetic approach to the study of science Yet this account considered by critics to be an unreflective assumption has prevented historical epistemology from developing a clear understanding and definition especially regarding how precisely historical and philosophical reflections on the sciences should be combined Thus this book

uniquely analyses how the problems and tensions inherent to the contemporary phase of historical epistemology can be clarified by reference to the classical French phase. The archaeological method of Michel Foucault which draws on and transforms fundamental insights by Gaston Bachelard and Georges Canguilhem is used to exert an enduring influence on the field especially through the work of Ian Hacking and his philosophical cum historical analyses of styles of scientific reasoning. Though this book is of great value to academic specialists and graduate students the fact it addresses questions broad in scope ensures it is also relevant to a range of scholars in many disciplines and will provoke discussion among those interested in foundational issues in history and philosophy of science. Vagelli's book provides a both unique and uniquely important window into historical epistemology and its relation to contemporary philosophy of science. Unique because nowhere else can one find a single work that treats the range of topics that he covers. Uniquely important because Vagelli's clear concise and comprehensive survey details key interrelationships among a range of American British and European views currently in play regarding historical epistemology and philosophy of science as well as the institutional and intellectual vectors driving their associated epistemological positions. Paul Roth UC Santa Cruz USA. Uneasily the history and philosophy of science have bolstered and undermined each other for all too long. Would history offer nothing but potted episodes to confirm or contradict transhistorical claims about science? Would philosophy dismantle uncritical historicist accounts of scientific discoveries? Historical epistemology offers a more integrated path at once a history of the present and a philosophy of the past. Matteo Vagelli draws together the insights of the Francophone Anglophone and Germanophone traditions to give us a sparkling lucid account of seeing our standards of scientific understanding as developing across time always asking how did we come to our standards of demonstration and argument. Peter Galison Harvard University USA.

The Origins of Writing as a Problem of Historical Epistemology Peter Damerow, 1999 **Epistemological Relativism and Relativistic Epistemology** Anders Tolland, 1991 The Virginia Review of Asian Studies, 2004 *Poznan Studies in the Philosophy of the Sciences and Humanities*, 1989 Political Epistemology Pietro Daniel Omodeo, 2019. This book is an investigation of the ideological dimensions of the disciplinary discourses on science in line with the scholarly tradition of historical epistemology. It offers a programmatic treatment of the political epistemological problematic along three entangled lines of inquiry: socio-historical, epistemological and historiographical. The book aims for a meta-level integration of the existing scholarship on the social and cultural history of science in order to consider the ways in which struggles for hegemony have constantly informed scientific discourses. This problematic is of primary relevance for scholars in Science Studies, philosophers, historians and sociologists of science but would also be relevant for anybody interested in scientific culture and political theory. *Four Dimensional Time* Rajesh Sampath, 1999. This work is a two division study of twentieth century philosophies of history in Europe. Fields engaged in the study are transcendental philosophy, speculative metaphysics, theology, historiographical theory and intellectual history. The main question concerns the historical finitude of History and its

temporal horizon The work explores the unsolved consequences of G W F Hegel s Phenomenology of Spirit 1807 and Martin Heidegger s Being and Time 1927 in twentieth century German and French philosophies of History **Consumer Cultures, Political Discourse and the Problem of Cultural Politics** Frank Mort,1992 From Plato to Hitler Christopher Sverre Norborg,1940
