## **Problems Of Law Its Past Present And Future:**

Lethe's Law Emilios Christodoulidis, Scott Veitch, 2001-05-09 This book offers a series of original essays by an international group of scholars whose work looks comparatively at law's attempts to deal with the past. Ranging from questions of criminal responsibility and amnesty to those of law's relation to time, memory and the ethics of reconciliation, it is a sustained jurisprudential and philosophical analysis of one of the most important and pressing legal concerns of our time. Among its key concerns is that justice's demand on law has changed and in the face of a divided and violent past, law is being called on to do the kind of work it ordinarily shuns. What this means for conventional understandings of law, as well as for the relation between law and politics in times of transition, is explored through a discussion of experiences from Eastern Europe and Germany to South Africa, Israel and Australia. The book thus provides a timely investigation of the nature of law and legal institutions in times of political and social change and will appeal to a broad international audience including lawyers, political theorists, criminologists and philosophers.

*Ubiquitous Law* Emmanuel Melissaris, 2016-02-17 *Ubiquitous Law* explores the possibility of understanding the law in dissociation from the State, while at the same time establishing the conditions of meaningful communication between various legalities. This book argues that the enquiry into the legal has been biased by the implicit or explicit presupposition of the State's exclusivity to a claim to legality, as well as the tendency to make the enquiry into the law the task of experts who purport to be able to represent the legal community's commitments in an authoritative manner. Very worryingly, the experts' point of view then becomes constitutive of the law and parasitic to and distortive of people's commitments. *Ubiquitous Law* counter suggests a new methodology for legal theory which will not be based on rigid epistemological and normative assumptions but rather on self-reflection and mutual understanding and critique, so as to establish acceptable differences on the basis of a commonality.
