FOURTH EDITION

**CHARLES E. THOMAS**

# Proceb Technology Equipment And Systems

**Jan-Philipp Büchler, Christina Hoon**

## **Process Technology Equipment And Systems:**

*Process Technology Equipment and Systems* Charles E. Thomas (Ph. D.), 2007 *Process Technology Equipment and Systems* has withstood the test of time successfully launching thousands of process technicians into the chemical processing industry. The Second Edition carries on this tradition of excellence by providing state of the art graphics and photos alongside completely current information that keeps pace with industry developments. Key topics include valves, vessels and piping, pumps and compressors, motors and turbines, heat exchangers, cooling towers, boilers and furnaces, reactors and distillation, extraction and separation systems, and process instrumentation.

**Process Technology Equipment and Systems** Charles E. Thomas, 2002 *Process Technology Equipment and Systems* provides an in depth survey of the equipment commonly found in chemical processing plants and the chemical processing systems used in these plants. Much of the content of this new book was previously published in *The Process Technology Handbook*, the best selling textbook for process plant operators. Each chapter includes objectives, a list of the key terms in that chapter and their definitions, thorough discussion and explanation of the content of that chapter, chapter summary and review questions. A glossary is included at the back of the book.

**Process Technology Equipment and Systems-Instructor's Guide** Kenneth W. Thomas, 2002-01-01

**Process Technology Equipment** NAPTA, 2018 *The Process Industries Challenge*. In the early 1990s, the process industries recognized that they would face a major staffing shortage because of the large number of baby boomer employees who would be retiring. Industry partnered with community colleges, technical colleges, and universities to remedy this situation. Together they developed this series which provides consistent curriculum content and exit competencies for process technology graduates to ensure a knowledgeable and competent staff that is ready to take over the demands of the field. The collaborators in education and industry also recognized that training for process technicians would benefit industry by reducing the costs associated with training and traditional hiring methods. This was how the NAPTA series for Process Technology was born. To achieve consistency of exit competencies among graduates from different schools and regions, the Gulf Coast Process Technology Alliance and the Center for the Advancement of Process Technology identified a core technical curriculum for the Associate Degree in Process Technology. This core consists of eight technical courses and is taught in alliance member institutions throughout the United States. Instructors who teach the process technology core curriculum and who are recognized in industry for their years of experience and depth of subject matter expertise requested that a textbook be developed to match the standardized curriculum.
