Fundamentals of Database Systems Ramez Elmasri, Sham Navathe, 2004 This is a revision of the market leading book for providing the fundamental concepts of database management systems Clear explanation of theory and design topics Broad coverage of models and real systems Excellent examples with up to date introduction to modern technologies Revised to include more SQL more UML and XML and the Internet On Knowledge Base Management Systems Michael L. Brodie, John Mylopoulos, 2012-12-06 Current experimental systems in industry government and the military take advantage of

knowledge based processing For example the Defense Advanced Research Projects Agency DARPA and the United States Geological Survey USGS are supporting the development of information systems that contain diverse vast and growing repositories of data e g vast databases storing geographic information These systems require powerful reasoning capabilities and processing such as data processing communications and multidisciplinary of such systems will scientific analysis The number and importance grow significantly in the near future Many of these systems are severely limited by current knowledge base and database systems technology Currently knowledge based system technology lacks the means to provide efficient and robust knowledge bases while database system technology lacks knowledge representation and reasoning capabilities The time has come to face the complex research problems that must be solved before we can design and implement real large scale software systems that depend on knowledge based processing To date there has been little research directed at integrating knowledge base and database technologies It is now imperative that such coordinated research be initiated and that it respond to the urgent need for a technology that will enable operational large scale knowledge based system applications

Very Large Data Bases Wesley W. Chu, Georges Gardarin, Yahiko Kambayashi, Setsuo Ōsuga, 1986 The purpose of this conference series is to provide an international forum for the promotion of an understanding of current research the exchange of ideas experiences and future directions for database systems Database techniques are expanding into many novel environments and application areas such as office systems database machines computer aided design computer aided manufacturing historical database systems distributed database systems knowledge based systems and the management of unformatted data such as text and graphical images The contents of these proceedings reflect these areas with forty six full papers two short papers and position papers for two panel sessions

Storage Systems Alexander Thomasian, 2021-10-13 Storage Systems Organization Performance Coding Reliability and Their Data Processing was motivated by the 1988 Redundant Array of Inexpensive Independent Disks proposal to replace large form factor mainframe disks with an array of commodity disks Disk loads are balanced by striping data into strips with one strip per disk and storage reliability is enhanced via replication or erasure coding which at best dedicates k strips per stripe to tolerate k disk failures Flash memories have resulted in a paradigm shift with Solid State Drives SSDs replacing Hard Disk Drives HDDs for high performance applications RAID and Flash have resulted in the emergence of new storage companies namely EMC NetApp SanDisk and Purestorage and a multibillion dollar storage market Key new conferences and publications are reviewed in this book The goal of the book is to expose students researchers and IT professionals to the more important developments in storage systems while covering the evolution of storage technologies traditional and novel databases and novel sources of data We describe several prototypes FAWN at CMU RAMCloud at Stanford and Lightstore at MIT Oracle's Exadata AWS Aurora Alibaba's PolarDB Fungible Data Center and author's paper designs for cloud storage namely heterogeneous disk arrays and hierarchical RAID Surveys storage technologies and lists sources of data

measurements text audio images and video Familiarizes with paradigms to improve performance caching prefetching log structured file systems and merge trees LSMs Describes RAID organizations and analyzes their performance and reliability Conserves storage via data compression deduplication compaction and secures data via encryption Specifies implications of storage technologies on performance and power consumption Exemplifies database parallelism for big data analytics deep learning via multicore CPUs GPUs FPGAs and ASICs e g Google s Tensor Processing Units Object-oriented Concepts, Databases and Applications Won Kim, Frederick H. Schneider, 1990 Abstract High performance multiprocessor database machines have been made feasible with the advent of cheap powerful microprocessors and large main memories However exploiting these platforms to support high speed complex query processing has lagged behind the hardware technology The thrust of this dissertation has concentrated on developing strategies for efficiently processing join queries consisting of on the order of 10 joins in a parallel database machine with hundreds of processors Although the algorithms were developed with a shared nothing architecture in mind the algorithms can be applied to shared memory systems with little modification Readings in Object-Oriented Database Systems Stanley B. Zdonik, David Maier, 1990 This comprehensive collection is a survey of research in object oriented databases offering a substantive overview of the field section introductions and over 40 research papers presented in their original scope and detail The balanced selection of articles presents a confluence of ideas from both the language and database research communities that have contributed to the object oriented paradigm The editors develop a general definition and model for object oriented databases and relate significant research efforts to this framework Further the collection explores the fundamental notions behind object oriented databases semantic data models implementation of object oriented systems transaction processing interfaces and related approaches Research and theory are balanced by applications to CAD systems programming environments and office information systems **Proceedings, ...
