Networked Data Acquisition Systems (Daq 96) - Proceedings Of The Second International Data Acquisition Workshop Shuhei Ajimura, Masaharu Nomachi, 1997-07-15 This workshop followed the First International Conference which was hosted by Fermilab on 26-28 October 1994. That conference discussed the switch type event builder. Much intensive R & D work ensued from it showing the importance of 1) data flow control and 2) high speed memory access on network adapters/drivers. Those two themes are involved in many networked data acquisition systems. Therefore Networked Data Acquisition Systems was selected as the theme of DAQ 96. It includes a wide variety of data acquisition system presentations from present and near future experiments at high energy and nuclear physics laboratories. **Index of Conference Proceedings** British Library. Document Supply Centre, 2002. *2000 IEEE Nuclear Science Symposium*, 2001. **A Study of the Isoscalar Giant Monopole Resonance** Darshana Chandrakant Patel, 2015-12-24 This thesis reports on investigations of a specific collective mode of nuclear vibration the isoscalar giant monopole resonance ISGMR the nuclear breathing mode the energy of which is directly related to a fundamental property of nuclei the nuclear incompressibility. The alpha inelastic scattering experiments reported in this thesis have been critical to answering some fundamental questions about nuclear incompressibility and the symmetry energy quantities that are crucial to our understanding of a number of phenomena in nuclear physics and astrophysics including collective excitations in nuclei radii of neutron stars and the nature of stellar collapse and supernova explosions. The work described included three sets of experiments and subsequent sophisticated data analysis both leading to results that have been welcomed by the community and recognised as important contributions to the field. *Scientific and Technical Aerospace Reports*, 1994-06. **Books in Print**, 1991.

Immunological Computation Dipankar Dasgupta, Fernando Nino, 2008-09-12 Clearly nature has been very effective in creating organisms that are capable of protecting themselves against a wide variety of pathogens such as bacteria fungi and parasites. The powerful information processing capabilities of the immune system such as feature extraction pattern recognition learning memory and its distributive nature provide. *IBM Systems Journal* International Business Machines Corporation, 1997.
