Proceedings of Gökova Geometry-Topology Conference 2002 Selman Akbulut, Turgut Önder, Ronald J. Stern, 2001
Proceedings of Gökova Geometry-topology Conference 1993 Selman Akbulut, Turgut Önder, 1994 This volume is the proceedings of the Second G kova which was held in May 1993 G kova is located at the scenic southwest coast of Turkey next to a forest preserve **Index of Conference Proceedings** British Library. Document Supply Centre, 2003 , **Fukaya Categories and Picard-Lefschetz Theory** Paul Seidel, 2008 The central objects in the book are Lagrangian submanifolds and their invariants such as Floer homology and its multiplicative structures which together constitute the Fukaya category The relevant aspects of pseudo holomorphic curve theory are covered in some detail and there is also a self contained account of the necessary homological algebra Generally the emphasis is on simplicity rather than generality The last part discusses applications to Lefschetz fibrations and contains many previously unpublished results The book will be of interest to graduate students and researchers in symplectic geometry and mirror symmetry *Algebraic and Combinatorial Aspects of Tropical Geometry* Erwan Brugalle, Maria Angelica Cueto, Alicia Dickenstein, Eva-Maria Feichtner, Ilia Itenberg, 2013-05-23 This volume contains the proceedings of the CIEM workshop on Tropical Geometry held December 12 16 2011 at the International Centre for Mathematical Meetings CIEM Castro Urdiales Spain Tropical geometry is a new and rapidly developing field of mat **Birational Geometry, Rational Curves, and Arithmetic** Fedor Bogomolov, Brendan Hassett, Yuri Tschinkel, 2013-05-17 This book features recent developments in a rapidly growing area at the interface of higher dimensional birational geometry and arithmetic geometry It focuses on the geometry of spaces of rational curves with an emphasis on applications to arithmetic questions Classically arithmetic is the study of rational or integral solutions of diophantine equations and geometry is the study of lines and conics From the modern standpoint arithmetic is the study of rational and integral points on algebraic varieties over nonclosed fields A major insight of the 20th century was that arithmetic properties of an algebraic variety are tightly linked to the geometry of rational curves on the variety and how they vary in families This collection of solicited survey and research papers is intended to serve as an introduction for graduate students and researchers interested in entering the field and as a source of reference for experts working on related problems Topics that will be addressed include birational properties such as rationality unirationality and rational connectedness existence of rational curves in prescribed homology classes cones of rational curves on rationally connected and Calabi Yau varieties as well as related questions within the framework of the Minimal Model Program *Mathematical Reviews* , 2008 Lectures and Surveys on G2-Manifolds and Related Topics Spiro Karigiannis, Naichung Conan Leung, Jason D. Lotay, 2020-05-26 This book one of the first on G2 manifolds in decades collects introductory lectures and survey articles largely based on talks given at a workshop held at the Fields Institute in August 2017 as part of the major thematic program on geometric analysis It provides an accessible introduction to various aspects of the geometry of G2 manifolds including the

construction of examples as well as the intimate relations with calibrated geometry Yang Mills gauge theory and geometric flows It also features the inclusion of a survey on the new topological and analytic invariants of G2 manifolds that have been recently discovered The first half of the book consisting of several introductory lectures is aimed at experienced graduate students or early career researchers in geometry and topology who wish to familiarize themselves with this burgeoning field The second half consisting of numerous survey articles is intended to be useful to both beginners and experts in the field

Grid Homology for Knots and Links Peter S. Ozsváth,András I. Stipsicz,Zoltán Szabó,2015-11-30 Starting from the combinatorial point of view on knots using their grid diagrams this book serves as an introduction to knot theory After a brief overview of the background material in the subject the book gives a self contained treatment of knot Floer homology from the point of view of grid diagrams
