Yosemite Sequoia and Kings Canyon National Parks all in California s Sierra Nevada created a human bear problem so bad that there were eventually over 2 000 incidents in a single year It then describes the pivotal moments during which park employees used trial and error conducted research invented devices collaborated with other parks and found funding to get the crisis back under control Speaking of Bears is for bear lovers national park buffs historians wildlife managers biologists policy and grant makers and anyone who wants to know the who what where when and why of what once was a serious human bear problem and the path these parks took to correct it Although these Sierran parks had some of the worst black bear problems in the country hosted much of the research and invented the bulk of the technological solutions they were not the only ones For that reason intertwining stories from several other parks including Yellowstone the Great Smoky Mountains and Banff Canada are included For anyone seeking solutions to human wildlife conflicts throughout the world the lessons learned are invaluable and widely applicable Black Bear Bibliography, 1982 ,1982 **Proceedings - Vertebrate Pest Conference** ,2010 *Proceedings of the Sixth Western Black Bear Workshop* Richard A.
