Proceedings Of The Dae Solid State Physics Symposium, December 1999 B. K. Godwal, R. Mukhopadhyay, 2000
The Proceedings Of The Dae Solid State Physics Symposia Sponsored By The Board Of Research In Nuclear Sciences Department Of Atomic Energy Government Of India Include Invited And Tutorial Talks Presented By Academicians Scientists And Students From Various Disciplines Of Solid State Physics Research And Development From India And Abroad It Covers A Wide Spectrum Of Research Activities In The Field Of Condensed Matter Physics **Proceedings of the DAE Solid State Physics Symposium**, 1999 Index of Conference Proceedings British Library. Document Supply Centre, 2001 **Indian Books in Print**, 2003 *Micromachined Mirrors* Robert Conant, 2013-04-17 Micromachined Mirrors provides an overview of the performance enhancements that will be realized by miniaturizing scanning mirrors like those used for laser printers and barcode scanners and the newly enabled applications including raster scanning projection video displays and compact high speed fiber optic components There are a wide variety of methods used to fabricate micromachined mirrors each with its advantages and disadvantages There are however performance criteria common to mirrors made from any of these fabrication processes For example optical resolution is related to the mirror aperture the mirror flatness and the scan angle Micromachined Mirrors provides a framework for the design of micromirrors and derives equations showing the fundamental limits for micromirror performance These limits provide the micromirror designer tools with which to determine the acceptable mirror geometries and to quickly and easily determine the range of possible mirror optical resolution and scan speed **Annual Reports on NMR Spectroscopy** Graham A. Webb, 2010-10-27 Nuclear magnetic resonance NMR is an analytical tool used by chemists and physicists to study the structure and dynamics of molecules In recent years no other technique has gained such significance as NMR spectroscopy It is used in all branches of science in which precise structural determination is required and in which the nature of interactions and reactions in solution is being studied Annual Reports on NMR Spectroscopy has established itself as a premier means for the specialist and non specialist alike to become familiar with new techniques and applications of NMR spectroscopy Provides updates on the latest developments in NMR spectroscopy Includes comprehensive review articles Highlights the increasing importance of NMR spectroscopy as a technique for structural determination **Ironmaking and Steelmaking** Zushu Li, Claire Davis, 2019-08-13 Steel is a critical material in our societies and will remain an important one for a long time into the future In the last two decades the world steel industry has gone through drastic changes and this is predicted to continue in the future The Asian countries e g China India have been dominant in the production of steel creating global over capacity while the steel industry in the developed countries have made tremendous efforts to reinforce its global leadership in process technology and product development and remain sustainable and competitive The global steel industry is also facing various grand challenges in strict environmental regulation new energy and materials sources and ever increasing customer requirements for high

quality steel products which has been addressed accordingly by the global iron and steel community This Special Issue Ironmaking and Steelmaking released by the journal Metals published 33 high quality articles from the international iron and steel community covering the state of the art of the ironmaking and steelmaking processes This includes fundamental understanding experimental investigation pilot plant trials industrial applications and big data utilization in the improvement and optimization of existing processes and research and development in transformative technologies It is hoped that the creation of this special issue as a scientific platform will help drive the iron and steel community to build a sustainable steel industry

Multi-voltage CMOS Circuit Design Volkan Kursun,Eby G. Friedman,2006-08-30 This book presents an in depth treatment of various power reduction and speed enhancement techniques based on multiple supply and threshold voltages A detailed discussion of the sources of power consumption in CMOS circuits will be provided whilst focusing primarily on identifying the mechanisms by which sub threshold and gate oxide leakage currents are generated The authors present a comprehensive review of state of the art dynamic static supply and threshold voltage scaling techniques and discuss the pros and cons of supply and threshold voltage scaling techniques
