Faludi,2013-10-22 Planning theorists are often criticised for being insufficiently concerned with the needs of practitioners The author of this book takes a view of planning which centres around the decision making process and offers a theoretical approach which takes practice as its starting point Building on his earlier important work Planning Theory Pergamon URPS 1984 first edition 1973 this book constitutes a further major advance in planning thought synthesizing the influence of the British IOR School with the American rational planning model Going beyond previous generic approaches the work culminates in a consideration of theory and practice in the planning of all forms of environmental intervention **Mojave Lands** Elisabeth M. Francis,Leslie Francis,2003 It s my land I can do whatever I want with it This is our neighborhood or city or park and we should be the ones deciding how it s used These are two strongly held and diametrically opposed views of appropriate land use As John G and Leslie Pickering Francis demonstrate the debate about what to do with land is messy complex and often based on dangerously misguided principles Raising the question of what rights owners community as well as individual in fact have the Francises argue that land stewardship transcends narrow spatial definitions Their analysis of the discourse about property ownership offers a sophisticated much needed approach to land use policy *Catalog of Copyright Entries.
