Private Schooling Tradition Change And Diversity:

Private Schooling Geoffrey Walford, 1991-03-28 Private education in Britain is expanding From about five per cent of the school population being in private schools during 1980 there are now more than seven per cent of children in these schools For many centuries these schools have educated a large proportion of the leaders of the British society and there is little indication of any great change in their importance About a quarter of present university undergraduates were educated in private schools and about half of those at Oxford and Cambridge spent their teenage years in them Yet despite their significance private schools have been very little researched and most of what has been published has been concerned with the major boys public schools

Privatschulen versus staatliche Schulen Aydin Gürlevik, Christian Palentien, Robert Heyer, 2013-03-28 Privatschulen wurden noch bis zur Jahrtausendwende eher als Ersatzinstrumente p dagogischer

Innovation Vielfalt Autonomie Freiheit und Kreativit t zur staatlichen Schule gehandelt Heute bestimmen Themen wie Effektivit t und Effizienz Leistung und Erfolg Bildungsmarkt Wettbewerb und konomisierung der Bildung den Bildungsdiskurs Dieser kontroverse Rollenwandel von Privatschulen und staatlichen Schulen steht im Mittelpunkt dieses Bandes um einen umfassenden und systematischen Vergleich vorzunehmen und damit neue Perspektiven f r die

Schulentwicklung zu gewinnen **In Defence of Religious Schools and Colleges** Elmer John Thiessen, 2001 It is often argued that religious schools and colleges promote intolerance divisiveness and fanaticism and that they violate the principle of academic freedom Some writers also suggest that economic support for religious schools by the state violates the principle of the separation of church and state Elmer Thiessen provides a philosophical defence of religious schools and colleges against these and other standard objections He concludes with a radical proposal a pluralistic educational system will better prepare students for citizenship in pluralist liberal democracies than a monopolistic state maintained school system In placing his argument within the context of liberal democratic values Thiessen gives concrete examples of objections to religious schools and offers practical suggestions that follow from the philosophical treatment of the problem In Defence of Religious Schools and Colleges bridges the gap between philosophical argument and educational practice It will be of interest not only to philosophers and educational theorists but also to practitioners in education Academics policy makers political theorists lay people teachers administrators and parents those who object to religious schools and colleges and those who find themselves trying to answer the objections will benefit from reading this book

Durkheim and Modern Education W.S.F. Pickering, Geoffrey Walford, 2002-09-11 This volume explores Durkheim s place in modern educational thought at three different levels Durkheim s ideas on education are analyzed and placed in the context of modern society current educational issues are explored using a Durkheimian framework Durkheim s thought is related to that of modern educational theorists to reveal his enduring influence In discussing Durkheim s modern relevance the contributors stress his desire to integrate the practical and theoretical aspects of education They identify particular pertinence in his focus upon the moral base of

education and his insistence upon the importance of the social and society Doing Qualitative Educational Research Geoffrey Walford,2001-06-01 Geoffrey Walford a renowned and experienced researcher reflects upon the trials and tribulations and the problems and promises of conducting research and also on the links between the idiosyncrasies and circumstances of researchers and what is possible in research Research is revealed as a much more complicated process than is usually recognized sometimes messy and disorganized sometimes constrained in unexpected ways but always challenging to both researcher and reader Markets and Equity in Education Geoffrey Walford,2006-02-23 Geoffrey Walford tackles one of the perennial issues in education policy namely the inter relationship of markets and equity His discussion synthesises research findings his own in the context of others from over a decade examining the triangle between i theory ii policy both current and recent and iii practice *Affirming the Comprehensive Ideal* Richard Pring,Geoffrey Walford,1997 Examines the ideals which lay behind the development of comprehensive schools Written by 14 British educationalists this text considers the evidence and suggests how further progress might be made within the moral framework of secondary education for all irrespective of background or ability The text includes an afterword by the Rt Hon John Prescott MP Deputy Leader of the Labour Party **Choice and Equity in Education** Geoffrey Walford,1994 This book studies the history of choice in education looking in particular at two schemes in the UK assisted places and city technology colleges which were promoted to increase parental choice in schools As a contrast the author examines the debate in the United States looking at the magnet schools programme and the experiment in Boston where all parents are forced to choose

Education and Society ,2000 *Ethnography and Educational Policy Across the Americas* Bradley A. Levinson,2002-08-30 Annotation Presents innovative approaches both in the United States and in Latin America to studying education policy ethnographically **International Handbook of Educational Reform** Peter W. Cookson,Alan R. Sadovnik,Susan F. Semel,1992-06-23 Education has changed much especially during the last decade This comprehensive reference offers a systematic overview of developments in educational policy and practice around the world The editors have selected roughly 30 representative countries many of which are significant because of their power and population Each chapter written by an expert contributor treats educational reform in a particular nation The chapters place educational reform within philosophical historical political social and economic contexts and the consideration of common issues makes this volume a valuable source of comparative information The contributors employ a uniform approach throughout the work The issues discussed in each chapter include the impact of economic development educational expansion literacy movements achievement levels pedagogic and curriculum reform minority groups and women public and private education and the role of the State The final chapters examine several significant trends in greater detail Educators and policy makers will rely on this book as an indispensable reference tool **The International Encyclopedia of Education** Torsten Husén,T. Neville Postlethwaite,1994 **Environment & Planning** ,1995 The Making of Men Mairtin Mac an Ghaill,1994 Mairtin Mac an

Ghaill explores how boys learn to be men in schools while policing their own and others sexuality The text focuses on the students confusions and contradictions in their gendered experiences and upon how schools actively produce through the official and hidden curriculum a range of masculinities which young men come to inhabit The author attempts to do full justice to the complex phenomenon of male heterosexual subjectivities and to the role of schooling in forming sexual identities

Discourse and Reproduction Basil B. Bernstein,1995 Basil Bernstein was one of the most important figures in British sociology his ideas having inspired a great deal of empirical research and theoretical speculation throughout the world The purpose of this collection however is not to collect memoirs and celebrations of Bernstein It contains a collection of work by authors who are concerned with contemporary issues and analyses Each author represented has to some extent been influenced by Bernstein and thus uses Bernstein s ideas as a point of departure as well as to develop original analyses and perspectives All of the chapters in this volume are original and each chapter is intended to make a contribution to the sociology of education and educational thought

Changing Europe Angus Erskine,M. Elchardus,1996 Comprises a collection of essays on some of the key elements of change taking place within the social and political structures of Europe Covers issues such as class structure political alignment gender relations forms of production industrial relations and national identities Discusses also the nature of changes in schooling the challenges to existing forms of income maintenance and the role of social policy in the transformation from planned to market economies Covers mainly the period of the late 1980s and the early 1990s

Private Education Geoffrey Walford,2005-11-24 Private schools are central to the reproduction of social inequality For example whilst in the UK providing only about seven per cent of the school population about half of the undergraduates at Oxford and Cambridge still come from the private sector Private schools have long been associated with privilege and elitism While this traditional elitist aspect to the private sector is still central the private school sector is actually far more diverse that is usually acknowledged It now includes many small schools and faith based schools that may not offer the traditional advantages of the private sector but which provide a particular environment deemed desirable by parents In spite of their educational and social importance there has been very little academic research and writing on private schools The proposed book will be the culmination of Professor Walford s research into private schools over the past twenty years

Making Sense of the Global Raúl Acosta,Sadaf Rizvi,Ana Santos,2010 Anthropology is more relevant than ever before to making sense of the constant intercultural encounters taking place around the world Even though the discipline was born out of the need to understand the way humans interact it had for decades been trapped in a counter cultural stance that effectively disarmed it of any direct influence on public affairs Recent global trends however have brought this academic discipline to the attention of governments agencies and social entrepreneurs because of its capacity to create bridges of understanding between people of contrasting cultures This ability is today more necessary than ever before in facing the challenges posed by the shrinking of our world This volume provides reflections on what anthropological

research can offer through its oethick analyses We are convinced that ethnographic research can contribute to a better understanding of social phenomena in our global times Contradiction and Conflict David Coulby, Leslie Bash, 1991

Education Tomorrow Ian Lawrence, 1994 This book aims to provoke and facilitate debate on the issues facing educators in the UK It brings together a range of authors with a wide experience of schooling Editor Ian Lawrence sets the tone by asking what has been learned in the last 50 years Other key issues discussed include the professionalization of teaching the transition from school to work the changing nature and structure of UK primary schools management training as part of teacher professionalism the future for special educational needs collaboration between schools the need for a radical reappraisal of science and technology provision the reality of parental choice and the influence of Europe In the final chapter Lawrence asks another question Education in the UK obituary or rebirth
