Education and Neoliberal

Globalization Carlos Alberto Torres, 2008-11-19 This volume by noted critical education scholar Carlos Alberto Torres takes up the question of how structural changes in schooling and the growing impacts of neoliberalism and globalization affect social change national development and democratic educational systems throughout the world The first section of the book offers analytical avenues to understand and criticize the practices and policies of neoliberal states both domestically and internationally More than a mere lament of the state of educational policy however Torres also documents the critiques and alternatives developed by social movements against neoliberal governments and policies Ultimately his work urges readers to engage in the struggle to resist the oppressive forces of neoliberal globalization and proactively and deliberately act in informed ways to create a better world

Models of Capitalism Evelyne Huber, 2002 Latin American societies have undergone fundamental changes in the past two decades moving from capitalist economies with very wide ranging state intervention to more market driven systems After a prolonged period of recession these changes produced some successes in economic growth in the 1990s but they also exacerbated many problems especially poverty and inequality *Models of Capitalism* examines why some societies with market economies perform much better than others in combining growth and equity and what the less successful countries can learn from the more successful ones The contributors look at different models of capitalism in Latin America Northeast and Southeast Asia and advanced industrial countries asking which patterns of economic and social policies governments in the more successful societies pursued and which configurations of institutions made pursuing such policies possible The investigation focuses on economic policies designed to stimulate growth on labor market policies designed to promote a qualified labor force and increase productivity and wages and on social policies designed to improve general human capital and to distribute life chances in an equitable way The volume is innovative in explicitly connecting the discussion of growth policies with an analysis of labor market and social policies and in going beyond comparison of Latin American with East Asian approaches to include reference to equity oriented policies in North America and Western Europe as well This approach helps demonstrate how important policy design is in determining distributive outcomes at any given level of development The contributors are Antonio Alas Renato Baumann Ha Joon Chang Carlos H Filgueira Fernando Filgueira Robert Grosse Thomas Janoski John Myles T J Pempel Wilson Peres David Brian Robertson John Sheahan John D Stephens Victor E Tokman and Bridget Welsh Sponsored by the Joint Committee on Latin American Studies of the Social Science Research Council and the American Council of Learned Societies
