Private Selves Public Identities Reconsidering Identity Politics:

Private Selves, Public Identities Susan J. Hekman, 2010-11-01 In an age when we are all multiculturalists now as Nathan Glazer has said the politics of identity has come to pose new challenges to our liberal polity and the presuppositions on which it is founded Just what identity means and what its role in the public sphere is are questions that are being hotly debated In this book Susan Hekman aims to bring greater theoretical clarity to the debate by exposing some basic misconceptions about the constitution of the self that defines personal identity about the way liberalism conceals the importance of identity under the veil of the abstract citizen and about the difference and interrelationship between personal and public identity Hekman's use of object relations theory allows her to argue against the postmodernist resort to a fictive subject for a core self that is socially constructed in the early years of childhood but nevertheless provides a secure base for the adult subject Such a self is social particular embedded and connected a stark contrast to the neutral and disembodied subject posited in liberal theory This way of construing the self also opens up the possibility for distinguishing how personal identity functions in relation to public identity Against those advocates of identity politics who seek reform through the institutionalization of group participation Hekman espouses a vision of the politics of difference that eschews assigning individuals to fixed groups and emphasizes instead the fluidity of choice arising from the complex interaction between the individual's private identity and the multiple opportunities for associating with different groups and the public identities they define Inspired by Foucault's argument that power is everywhere Hekman maps out a dual strategy of both political and social cultural resistance for this new politics of identity which recognizes that with significant advances already won in the political legal arena attitudinal change in civil society presents the greatest challenge for achieving more progress today in the struggle against racism sexism and other forms of oppression

Private Selves, Public Identities Susan J. Hekman, 2005 [Lessons from the Identity Trail](#) Ian R. Kerr, Valerie M. Steeves, Carole Lucock, 2009 This contributed volume is the first multidisciplinary analysis about the problems and potential for anonymity and privacy in a networked society The book examines key questions about identity in a global environment that increasingly automates the collection of personal information and uses surveillance to reduce corporate and security risks

Radical Intellectuals and the Subversion of Progressive Politics Michael J. Thompson, Gregory Smulewicz-Zucker, 2015-09-09 *Radical Intellectuals and the Subversion of Progressive Politics* is a challenge to contemporary radical politics and political thought This collection of essays critiques the dominant trends and figures on the left that have distorted the legacy of progressive politics arguing that they have moved politics away from

issues of class and economic power toward a preoccupation with culture and identity The contributors discuss this new radicalism from the perspective of a more rational form of leftism capable of reviving interest in a more politically relevant form of politics

European Data Protection: In Good Health? Serge Gutwirth, Ronald Leenes, Paul De Hert, Yves Poullet, 2012-02-22 Although Europe has a significant legal data protection framework built up around EU Directive 95 46 EC and the Charter of Fundamental Rights the question of whether data protection and its legal framework are in good health is increasingly being posed Advanced technologies raise fundamental issues regarding key concepts of data protection Falling storage prices increasing chips performance the fact that technology is becoming increasingly embedded and ubiquitous the convergence of technologies and other technological developments are broadening the scope and possibilities of applications rapidly Society however is also changing affecting the privacy and data protection landscape The demand for free services security convenience governance etc changes the mindsets of all the stakeholders involved Privacy is being proclaimed dead or at least worthy of dying by the captains of industry governments and policy makers are having to manoeuvre between competing and incompatible aims and citizens and customers are considered to be indifferent In the year in which the plans for the revision of the Data Protection Directive will be revealed the current volume brings together a number of chapters highlighting issues describing and discussing practices and offering conceptual analysis of core concepts within the domain of privacy and data protection The book's first part focuses on surveillance profiling and prediction the second on regulation enforcement and security and the third on some of the fundamental concepts in the area of privacy and data protection Reading the various chapters it appears that the patient needs to be cured of quite some weak spots illnesses and malformations European data protection is at a turning point and the new challenges are not only accentuating the existing flaws and the anticipated difficulties but also more positively the merits and the need for strong and accurate data protection practices and rules in Europe and elsewhere

Constructing the Literary Self Patsy J. Daniels, 2014-06-02 In the twentieth century as previously excluded groups including ethnic minorities women the disabled and the differently gendered gained a voice in society group identity also changed and new definitions became necessary Whether through their group affiliations or in spite of these affiliations many individuals sought a new definition of themselves As can be expected much literature explores these changes and depicts the quest for new definitions and the search for individuality in the light of new definitions Construction or definition of the self was once available only to the elite and the freedom of some to define their identity was sacrificed so that others could make their own self definitions this practice can be found throughout much of history This volume is about that kind of oppression and various strategies of escaping from oppression as depicted in serious literature Its thirteen essays all by recognized scholars are divided into five categories Race Gender and the Self Assimilation and the Self Black Males and the Self Female Sexuality and the Self and The Family and the Self
