Advances in International Psychology. Research Approaches and Personal Dispositions, Socialization Processes and Organizational Behavior, 2013-01-01

Second Language Acquisition Processes in the Classroom Amy Snyder Ohta, 2001 This book is the first study to examine how interactional style develops within the walls of a foreign language classroom in the first two years of language study Results show learners to be highly sensitive to pragmatic information and that learners can move toward an appropriate interactional style through classroom interactive experience The book shows how learners are most often sources who offer assistance and correction with errors serving most often to stimulate further thinking about what form is correct Analysis shows learners to be active in seeking corrective information in the classroom setting not only from peer

partners but also from the teacher. They are active in noticing how the teacher's utterances even when addressed to others contrast with their own and utilize corrective feedback intended for other students. In addition, the results show that teacher-initiated corrective feedback addressed to individual learners is only one source of corrective feedback. Learners are shown to be active in both teacher-fronted and peer interactive settings. In newer L2 teaching methodologies which focus on the use of peer interactive tasks, the teacher's role has been de-emphasized. This book however shows how important the teacher's role is. The final chapter examines how the teacher can act to maximize the benefits of peer interactive tasks through how they design tasks and present them to the class. First, the chapter looks at how learners use English, their L1, in the classroom, concluding that how teachers present activities to the class has an impact on the amount of L1 used by students during peer interaction. Following up on this finding, the chapter works to address questions that teachers face in lesson planning and teaching. It presents a useful list of questions teachers can ask when designing peer interactive tasks in order to maximize the effectiveness of a wide variety of language learning tasks.

Awakening Children's Minds Laura E. Berk, 2001-10-25
Parents and teachers today face a swirl of conflicting theories about child rearing and educational practice. Indeed, current guides are contradictory, oversimplified, and at odds with current scientific knowledge. Now in *Awakening Children's Minds*, Laura Berk cuts through the confusion of competing theories, offering a new way of thinking about the roles of parents and teachers and how they can make a difference in children's lives. This is the first book to bring to a general audience, in lucid prose richly laced with examples, the truly state-of-the-art thinking about child rearing and early education. Berk's central message is that parents and teachers contribute profoundly to the development of competent, caring, well-adjusted children. In particular, she argues that adult-child communication in shared activities is the wellspring of psychological development. These dialogues enhance language skills, reasoning ability, problem-solving strategies, the capacity to bring action under the control of thought, and the child's cultural and moral values. Berk explains how children weave the voices of more expert cultural members into dialogues with themselves. When puzzling, difficult, or stressful circumstances arise, children call on this private speech to guide and control their thinking and behavior. In addition to providing clear roles for parents and teachers, Berk also offers concrete suggestions for creating and evaluating quality educational environments at home, in child care, in preschool, and in primary school, and addresses the unique challenges of helping children with special needs. Parents, Berk writes, need a consistent way of thinking about their role in children's lives, one that can guide them in making effective child-rearing decisions. *Awakening Children's Minds* gives us the basic guidance we need to raise caring, thoughtful, intelligent children.
