**Privatisation, Education and Social Justice** Geoffrey Walford, 2017-10-02 Privatisation in and of education is a process that takes many different forms and is deeply controversial While the shift in who pays is certainly an important dimension of privatisation there have also been changes in the management provision and delivery of schooling In most of the economically developed world discussion about the privatisation of education is now several decades old and yet new forms of privatisation are still being developed and old forms being applied to new situations This book examines the concept and nature of privatisation and explores the impacts of privatisation in terms of social justice The authors extend various arguments about the processes and provide new research and critique Some believe that privatisation can lead to increasing social justice for the poor while others argue the exact opposite This volume contributes to theoretical conceptions of social justice and education as well as providing up to date research results This book was originally published as a special issue of Oxford Review of Education

**Social Capital, Professionalism and Diversity**, 2009-01-01 Social Capital Professionalism and Diversity is a response to the challenges faced by teachers and other public sector professionals in attempting to manage an increasingly diverse population whilst simultaneously being subjected to public scrutiny through measures of performance Social capital has increasingly been seen by policy makers and academics as a possible resource for education allowing children and young people and the professionals who work with them to do better as a result of having strong networks relationships and trust There has

however been little attention to how social capital might actually be used by professionals within educational contexts or to the benefits of enhanced social capital for children and young people their families and the professionals themselves The contributors to this volume provide commentaries on what is known about social capital and its use in educational contexts the engagement of teachers and other professionals with diversity and social capital and diversity among children young people and families Social Capital Professionalism and Diversity will appeal to teacher educators and policymakers with concerns about the challenges faced by teachers and other public sector professionals and with an interest in how social capital might enable an effective response to diversity in educational contexts The book will be of particular interest and use to student and beginning teachers in responding to diversity as they develop their own professional identities and to practising teachers with an interest in pursuing new forms of professional renewal
