Herbert Heyer, 1989-07-12 The latest in this series of Oberwolfach conferences focussed on the interplay between structural probability theory and various other areas of pure and applied mathematics such as Tauberian theory infinite dimensional rotation groups central limit theorems harmonizable processes and spherical data Thus it was attended by mathematicians whose research interests range from number theory to quantum physics in conjunction with structural properties of probabilistic phenomena This volume contains 5 survey articles submitted on special invitation and 25 original research papers

Probability on Algebraic Structures Gregory Budzban, Arunava Mukherjee, 2000 This volume presents results from an AMS Special Session held on the topic in Gainesville FL Papers included are written by an international group of well known specialists who offer an important cross section of current work in the field In addition there are two expository papers that provide an avenue for non specialists to comprehend problems in this area The breadth of research in this area is evident by the variety of articles presented in the volume Results concern probability on Lie groups and general locally compact groups Generalizations of groups appear as hypergroups abstract semigroups and semigroups of matrices Work on symmetric cones is included Lastly there are a number of articles on the current progress in constructing stochastic processes on quantum groups

Konstruktive Galoistheorie Bernd H. Matzat, 1987-10-21 This volume is based on a lecture course on constructive Galois Theory given in Karlsruhe by the author The purpose of the course was to introduce students to the methods developed in the past few years for the realisation of finite groups as Galois groups over \mathbb{Q} or over abelian number fields Thus the book is addressed primarily to students with algebraic interests as seminar material Specialists also will find in it a multitude of examples of polynomials with special Galois groups which can of course also be used for the usual algebra courses

Probabilities on the Heisenberg Group Daniel Neuenschwander, 1996-08-19 This volume constitutes the proceedings of the Third International Workshop of the European Association for Machine Translation held in Heidelberg Germany in April 1993 The EAMT Workshops traditionally aim at bringing together researchers developers users and others interested in the field of machine or computer assisted translation research development and use The volume presents thoroughly revised versions of the 15 best workshop contributions together with an introductory survey by the volume editor The presentations are centered primarily on questions of acquiring sharing and managing lexical data but also address aspects of lexical description
