Probabilistic Site Characterization at the National Geotechnical Experimentation Sites Erik Vanmarcke, Gordon A. Fenton, 2003 GSP 121 contains seven peer reviewed papers exploring a broad range of methods of probabilistic site characterization *Probabilistic Approaches for Geotechnical Site Characterization and Slope Stability Analysis* Zijun Cao, Yu Wang, Dianqing Li, 2016-08-06 This is the first book to revisit geotechnical site characterization from a probabilistic point of view and provide rational tools to probabilistically characterize geotechnical properties and underground stratigraphy using limited information obtained from a specific site This book not only provides new probabilistic approaches for geotechnical site characterization and slope stability analysis but also tackles the difficulties in practical implementation of these approaches In addition this book also develops efficient Monte Carlo simulation approaches for slope stability analysis and implements these approaches in a commonly available spreadsheet environment These approaches and the software package are readily available to geotechnical practitioners and alleviate them from reliability computational algorithms The readers will find useful information for a non specialist to determine project specific statistics of geotechnical properties and to perform probabilistic analysis of slope stability *Computer Methods and Advances in Geomechanics* D. Contractor, C.S. Desai, S. Harpalani, J. Kemeny, T. Kundu, 2000-01-01 Covering a wide range of topics involving both research developments and applications resulting from the 10th International Conference on Computer Methods and Advances in Geomechanics IACMAG held in January 2001 in Tucson Arizona USA The theme of the conference was Fundamentals through Applications The up to date research results and applications in this 2 volume work 1900 pages should serve as a valuable source of information for those engaged in research analysis and design practical application and education in the fields of geomechanics and geotechnical engineering **Site and Geomaterial Characterization** Anand J.
