Gilles Deleuze and the Question of Philosophy Philip Goodchild,1996 In this book author Philip Goodchild tries to uncover the image of thought used by the French philosopher Gilles Deleuze He does so by focusing on the question What is philosophy posed implicitly throughout Deleuze s publications Goodchild traces the development of a highly sophisticated coherent and rigorous practice of thought that underlies Deleuze s apparently flamboyant and anarchic discourse This question of philosophy is posed in the context of an awareness of the historical social and cultural conditioning of a plurality of rationalities that bring into question the value of the philosophical enterprise as a whole Deleuze meets this problem by identifying something unthought and unthinkable that conditions the way in which people do in fact think and by directing philosophy toward this as its transcendental field Philosophy is no longer seen as an attempt to ascertain evaluate criticize or interpret knowledge or meaning but is seen as an exercise in creating concepts for use in the practical problems of life Ultimately Deleuze s philosophy constructs an affirmative and interactive kind of social relation which was embodied in his own intellectional relationship with Felix Guattari and which can form the basis for the organization of a new kind of society In conclusion this book examines Deleuze s deepest metaphysical presuppositions and finds that while a certain kind of materialism pervades Deleuze s thought the practice of that thought also presupposes a kind of metaphysics of creative

awareness where planes lines and crystals are folded onto each other into a fractal of philosophy By rethinking the question of philosophy in Deleuze's thought one can be led to open up a new meaning of life in terms of the Transcendence of this awareness to that which it conditions The result is an escape from the dead ends of postmodern thought

BOOK JACKET Title
Summary field provided by Blackwell North America Inc All Rights Reserved **Mind, Meaning and World** Ramesh Chandra Pradhan, 2019-04-25

The present book intends to approach the problem of mind meaning and consciousness from a non naturalist or transcendental point of view The naturalization of consciousness has reached a dead end There can be no proper solution to the problem of mind within the naturalist framework This work intends to reverse this trend and bring back the long neglected transcendental theory laid down by Kant and Husserl in the West and Vedanta and Buddhism in India The novelty of this approach lies in how we can make an autonomous space for mind and meaning without denying its connection with the world The transcendental theory does not disown the embodied nature of consciousness but goes beyond the body in search of higher meanings and values The scope of this work extends from mind and consciousness to the world and brings the world into the space of mind and meaning with a hope to enchant the world The world needs to be retrieved from the stranglehold of scientism and naturalism This book will dispel the illusion about naturalism which has gripped the minds of our generation The researchers interested in the philosophy of mind and consciousness can benefit from this work
