

Example 2: Solve the following equation:

$$7(y - 3) = 2(y - 9) + 2y$$

$$7y - 21 = 2y - 18 + 2y$$

$$7y - 21 = 4y - 18$$

$$\begin{array}{r} -4y \\ \hline 3y - 21 = -18 \\ +21 \quad +21 \end{array}$$

$$3y = 3$$

Problem Solving Algebra Too:

Mathematical Problem Solving and New Information Technologies Joao P. Ponte, Joao F. Matos, Jose M. Matos, Domingos Fernandes, 2013-06-29 A strong and fluent competency in mathematics is a necessary condition for scientific technological and economic progress. However, it is widely recognized that problem solving reasoning and thinking processes are critical areas in which students' performance lags far behind what should be expected and desired. Mathematics is indeed an important subject but is also important to be able to use it in extra mathematical contexts. Thinking strictly in terms of mathematics or thinking in terms of its relations with the real world involve quite different processes and issues. This book includes the revised papers presented at the NATO ARW Information Technology and Mathematical Problem Solving Research held in April 1991 in Viana do Castelo, Portugal, which focused on the implications of computerized learning environments and cognitive psychology research for these mathematical activities. In recent years, several committees, professional associations, and distinguished individuals throughout the world have put forward proposals to renew mathematics curricula, all emphasizing the importance of problem solving. In order to be successful, these reforming intentions require a theory-driven research base. But mathematics problem solving may be considered a chaotic field in which progress has been quite slow.

Math Instruction for Students with Learning Problems Susan Perry Gurganus, 2017-02-24 Math Instruction for Students with Learning Problems, Second Edition, provides a research-based approach to mathematics instruction designed to build confidence and competence in pre and in-service PreK-12 teachers. This core textbook addresses teacher and student attitudes toward mathematics as well as language issues, specific mathematics disabilities, prior experiences, and cognitive and metacognitive factors. The material is rich with opportunities for class activities and field extensions, and the second edition has been fully updated to reference both NCTM and CCSSM standards throughout the text and includes an entirely new chapter on measurement and data analysis.

Math Instruction for Students with Learning Difficulties Susan Perry Gurganus, 2021-11-29 This richly updated third edition of Math Instruction for Students with Learning Difficulties presents a research-based approach to mathematics instruction designed to build confidence and competence in preservice and inservice PreK-12 teachers. Referencing benchmarks of both the National Council of Teachers of Mathematics and Common Core State Standards for Mathematics, this essential text addresses teacher and student attitudes towards mathematics as well as language issues, specific mathematics disabilities, prior experiences, and cognitive and metacognitive factors. Chapters on assessment and instruction precede strands that focus on critical concepts. Replete with suggestions for class activities and field extensions, the new edition features current research across topics and an innovative thread throughout chapters and strands: multi-tiered systems of support as they apply to mathematics instruction.
