Meeting,1998      Psychotherapy Or Active Focused Problem Solving for Persons in Crisis Richard Steven Zipper,1976      **The Relationship Between Adult Educator Style and Community Problem-solving Group Members' Subsequent Participation in Educational Activities** Gloria A. Hay,1987      Women in Leadership Positions in the People's Republic of China Maria Adnane,2020-06-02 Master s Thesis from the year 2012 in the subject Business economics Business Management Corporate Governance grade 1 7 Heilbronn University language English abstract Women are still significantly underrepresented in Top Management positions and leadership is still associated with the male gender as leadership theories traditionally focus on men This is especially evident in China which has one of the world s highest female labor participation but a female share of only eight percent on the corporate boards Although Chinese women s tertiary educational attainment is now equal to the tertiary education of Chinese men they still face many barriers on their way to the top The strong influence of Confucian values perceiving women as inferior to men remains noticeable until today and women find themselves exposed to a strongly patriarchal business environment As being traditionally the main care givers of their families they are deemed to be expensive potential mothers and thus gender preference can be observed second Classical leadership theories of the Western culture as well as of the Chinese culture are introduced to provide a common understanding of their approaches Further the situation of women in the past and of today is being compared as well as their leadership styles access to managerial leadership positions and the barriers they face Since educational attainment of both genders does not explain why women are rarely found on the upper managerial ranks other reasons that could be a barrier for women s career advancement are examined in this research      *TQC Solutions* ,1991      *Dealing with People Problems at Work* Stephen Palmer,Timothy John Burton,1996 A look at how to best to tackle people problems at work appropriate for any situation where people work together The book is aimed at anyone who routinely deals with people problems and is flexible and honest enough to use these applications on themselves as well as colleagues This book is about positive action setting the scene by providing a definitive selection of problem solving skills such as tools for dealing with problems you might create for others and aiming to help staff deal with their own problems It provides clarification on what is termed as a people problem and what is meant by dealing with an issue Divided into three parts Part One examines basic skills and ideas for problem solving reviews current problem strategies and discusses people s experiences and reactions to work related situations Part Two reflects the framework for a problem solving interview and the range of skills required and Part Three features wider issues that may arise in the organizational context and also refinements to problem solving

**People Solve Problems** Jamie Flinchbaugh,2021-10-26 Every person in every function of every organization is involved in solving problems They show up in your email inbox in meetings in your own work They are strategic and tactical mundane and breakthrough easy and difficult Most organizations want to and need to improve their people s problem solving efforts and so they offer them tools templates and training Yet this is not where the leverage for impact is found People Solve Problems The Power of Every Person Every Day Every Problem explores the real leverage to improve your problem solving In the first section of the book we explore the problem with problem solving including both the value and limits of tools and templates We also explore the marriage of problem solving and standards Building on that start People Solve Problems is built on four primary domains After setting up the challenge we start by exploring People Centered Capabilities These capabilities are tool agnostic equally applicable to any chosen problem solving method or no method at all This includes a wide range of capabilities from creating problem statements to integrating intuition into problem solving Next we cover Problem Solving Culture These chapters outline the culture needed in the organization or the personal behaviors you must master to be successful in problem solving The behaviors explored range from deliberately learning through problem solving to building transparency vulnerability and trust In the third section we dive into Success through Coaching Problem solving is unlike other practices training is incredibly insufficient and coaching is the major driver of success This section addresses the why who when where and of course the important how of coaching Finally we explore the Role of the Leader whether the CEO or a team leader in building an environment where problem solving can thrive The leader must be the architect of their problem solving systems a shaper of culture and a framer of problems Problem solving effectiveness is critical to success for both the problems you already know about and those you have not yet experienced People Solve Problems will you help you and those you lead to be more effective now and in the future
