- Increase in demand:** The buyers who purchase the item price (the demand curve) at each price level, shifting the demand curve to the right.
- Decrease in demand:** The buyers who purchase the item price (the demand curve) at each price level, shifting the demand curve to the left.

7 Increase and Decrease in Supply

- Increase in supply:** The sellers who purchase the item price (the supply curve) at each price level, shifting the supply curve to the right.
- Decrease in supply:** The sellers who purchase the item price (the supply curve) at each price level, shifting the supply curve to the left.

2. Law of Supply and Supply Schedule

The law of supply states that all else being equal, as the price of a good or service increases, the quantity supplied increases, and vice versa. A supply schedule is a table that shows the quantity supplied at different prices, where all other factors are held constant.

3. The Supply Curve

The supply curve is upward-sloping, indicating a positive relationship between price and quantity supplied. It shows the

4. Equilibrium Price and Quantity

Equilibrium occurs when the demand and supply curves intersect. At this point, the quantity demanded equals the quantity supplied, resulting in no shortage or surplus. The price at this intersection is the equilibrium price and the corresponding quantity is the equilibrium quantity.

5. Changes in Quantity Demanded and Quantity Supplied
