Problems Of Origins And Development:

The Problem of Slavery as History Joseph C. Miller, 2012-03-27 Why did slavery an accepted evil for thousands of years suddenly become regarded during the eighteenth century as an abomination so compelling that Western governments took up the cause of abolition in ways that transformed the modern world Joseph C Miller turns this classic question on its head by rethinking the very nature of slavery arguing that it must be viewed generally as a process rather than as an institution Tracing the global history of slaving over thousands of years Miller reveals the shortcomings of Western narratives that define slavery by the same structures and power relations regardless of places and times concluding instead that slaving is a process which can be understood fully only as imbedded in changing circumstances Identity, Trauma, Sensitive and Controversial Issues in the Teaching of History Hilary Cooper, Jon Nichol, 2015-10-13 History Education is a politically contested subject It can be used to both promote xenophobia and to develop critical thinking multiple perspectives and tolerance Accordingly this book critically examines complex issues and constructivist approaches that make history relevant to students understanding of the modern world As such it has global appeal especially in North and South America Canada Europe and Asia The book s authors address the major challenges that History Education faces in an era of globalisation digital revolution and international terror nationalism and sectarian and religious conflict and warfare Central to this volume are controversial issues trauma and questions of personal and national identity from a wide range of international settings and perspectives The research in this book was undertaken by leading history educators from every continent Their interdisciplinary research represents an important contribution to the teaching of social sciences social psychology civic education programmes history and history education in schools colleges and universities The book offers new approaches to history educators at all levels In addition the chapters offer potential as required reading for students to both develop an international perspective and to compare and contrast their own situations with those that the book covers Section I considers issues related to identity how can history education promote social coherence in multicultural societies in societies divided by sectarianism or countries adapting to regime changes whether Communist or Fascist including for example South Africa previously Communist countries of Eastern Europe and previous dictatorships in South America and Western Europe It discusses such questions as How important is it that students learn the content of history through the processes of historical enquiry What should that content be and who should decide it educators or politicians What is the role of textbooks and who should write and select them Should history be taught as a discrete discipline or as part of a citizenship or social sciences curriculum Sections II and III explore ways in which memory of sensitive issues related to the past to war or to massacres may be addressed Are there new methodologies or approaches which make this possible How can students understand situations involving intolerance and injustice **A History of Roget's Thesaurus : Origins, Development, and Design** Werner Hülsen, 2003-11-27 In 1852 Peter Mark Roget eclipsed a rich tradition of topically based dictionaries with the

publication of his Thesaurus of English Words and Phrases Classified and Arranged so as to Facilitate the Expression of Ideas Based on intuition as much as on specific linguistic principles Roget's book has been a bestseller ever since and is one of the most widely used reference works ever published In this book Werner Hußmann gives the first history of its genesis and publication and investigates the principles of its structural design The author opens with an account of Roget's life and his background in natural science He then charts the parallel histories of dictionaries of synonyms and concepts within the general context of lexicography Synonymy he argues is a necessary feature of languages without which communication would be impossible He traces its theory and practice from Plato to the emergence of French and English synonym dictionaries in the seventeenth century Roget's was the first such book to be arranged by topic and the first to encompass the semantic network of the entire language The author examines the manner and method of its compilation the practical outcomes of the traditions on which it was based and the ways in which the Thesaurus reflects and reveals Roget's beliefs and background A History of Roget's Thesaurus will interest students and scholars of linguistics semantics and lexicography as well as anyone wishing to know more about a great literary achievement and an astonishing publishing phenomenon

Caste and Race A. V. S. de Reuck, Julie Knight, 2009-09-16 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world Japan's Invisible Race Hiroshi Wagatsuma, George De Vos, 2023-04-28 Modern Japanese share a myth to the effect that they harbor in their midst an inferior race less human than the stock that fathered their nation as a whole These pariahs numbering more than two million are segregated by caste just as firmly as the Negro is in the United States The present volume to which several Japanese and American social scientists have contributed offers an interdisciplinary description and analysis of this strangely persistent phenomenon inherited from feudal times Its main thesis is that caste and racism are derivatives of identical psychological

processes in human personality however differently structure they may be in social institutions It finds that what it terms status anxiety related to defensively held social values leads to a need to segregate disparaged parts of the population on grounds of innate inferiority Until the time of their official emancipation in 1871 the so called eta were distinguished visibly by their special garb Today few clues to their identity are visible yet they remain a distinguishable segregated segment of the population and bear inwardly in a psychological sense the stigma resulting from generations of oppression This volume traces the story of the outcasts in complete detail their origin their stormy post emancipation history and their present leftist political significance Large populations of outcasts live in urban ghettos within the major cities of south central Japan In some of these metropolitan centers they comprise up to 5 percent of the population but contribute 60 to 65 percent of unemployment and relief roles They have periodic trouble with the police they manifest a delinquency rate more than three times that of the ordinary population their children do poorly in school they are subject to various forms of job discrimination and few marriages are successfully consummated across the caste barrier Some try to escape their past identity by becoming prostitutes or by entering the underworld Those who survive discrimination to achieve status in society either live in fear of exposure if they are passing or overtly maintain their identity in proud isolation Some who live in rural communities have achieved equal economic status with their neighbors but not full social acceptance In their theoretical closing discussion the authors offer a challenging critique of Marxian class theory in introducing the concept of expressive exploitation that is the psychological use of a subordinate group as a repository of what is disavowed by the values of a culture in a caste society as distinct in form and function from the instrumental economic or political exploitation of subjected minorities in class societies Contributors Gerald Berreman John B Cornell John Donoghue Edward Norbeck John Price Yuzuru Sasaki George O Totten This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1966
