BOOK COVER **Prehistoric Scotland and Its Place in European Civilization** Robert Munro,1899 **Prehistoric Europe** Timothy Champion,2016-06-16 The study of European prehistory has been revolutionized in recent years by the rapid growth rate of archeological discovery advances in dating methods and the application of scientific techniques to archaeological material and new archaeological aims and frameworks of interpretation Whereas previous work concentrated

on the recovery and description of material remains the main focus is now on the reconstruction of prehistoric societies and the explanation of their development This volume provides that elementary and comprehensive synthesis of the new discoveries and the new interpretations of European prehistory After an introductory chapter on the geographical setting and the development of prehistoric studies in Europe the text is divided chronologically into nine chapters Each one describes with numerous maps plans and drawings the relevant archaeological data and proceeds to a discussion of the societies they represent Particular attention is paid to the major themes of recent prehistoric research especially subsistence economy trade settlement technology and social organization

Calgary doctoral thesis this study investigates the variability in faunal assemblages from both Bandkeramik and later Neolithic settlements over a wide area of central Europe A discussion of the interpretation of the Neolithic economy is followed by analyses of faunal assemblages investigation of the patterns of species dominance and hypotheses about domestic animal production **Women in Prehistory** Margaret R. Ehrenberg, Margaret Ehrenberg, 1989 Social attitudes in our culture have led to the assumption that early advances in human knowledge were the achievements of men the role of women in prehistoric times has been largely overlooked In this thought provoking book however Margaret Ehrenberg argues that the true contribution of women especially in the discovery and development of agriculture was much greater than has been acknowledged to date Examining the evidence from archaeological anthropological and classical documentary sources Ehrenberg throws new light on the lives of women and their social status in Europe from the Palaeolithic era to the Iron Age The relationship between the role of women and economic production is a central theme of this survey In Bronze Age and Iron Age societies individual women are seen to be in positions of power Although available evidence is fragmentary and often controversial Ehrenberg shows how information can be gathered from skeletons and grave goods found in burials from settlement sites from rock carvings and sculpted figurines as well as from anthropological parallels to enable significant inferences to be drawn about the life of prehistoric women *Prehistoric Antiquities of the Aryan Peoples*, 1890
