Problems Of Belief Philosophy In America Hardcover:

Issues in the Philosophy of Religion Nicholas Rescher, 2013-05-02 Over the years Nicholas Rescher has published various essays on religious issues from a philosophical point of view. The chapters of the present volume collect these together, joining to them four further pieces which appear here for the first time. Chapters 3, 7, and 8. While these studies certainly do not constitute a system of religious philosophy, they do combine to give a vivid picture of a well-defined point of view on the subject: the viewpoint of a Roman Catholic philosopher who in the longstanding manner of this tradition seeks to harmonize the commitments of faith with the fruits of inquiry proceeding under the auspices of reason. *PROBLEMS OF BELIEF* Ferdinand Canning Scott Schiller, 1976

Religious Diversity—What's the Problem? Rita M. Gross, 2014-04-24 Once upon a time, on grounds of both religion and common sense, people assumed that the earth was flat and that the sun literally rose and set each day. When newly developing knowledge made those beliefs untenable, giving them up was difficult. Today, the belief that only one of the world's various religions is true for all people on earth is equivalent to the belief in a flat earth. Both notions have become untenable given contemporary knowledge about religion. Even though many people are still troubled by the existence of religious diversity today, that diversity is a fact of life. Religious diversity should be no more troubling to religious people than the fact that the earth is round and circles the sun. This provocative book, based on the author's longtime practice of Buddhism and comparative study of religion, provides tools with which one can truly appreciate religious diversity as a gift and resource rather than as a deficiency or a problem to be overcome. After we accept diversity as inevitable and become comfortable with it, diversity always enriches life, both nature and culture.

Challenging the New Atheism Aaron Shepherd, 2020-08-31 This book presents a pragmatic response to arguments against religion made by the New Atheism movement. The author argues that analytic and empirical philosophies of religion, the mainstream approaches in contemporary philosophy of religion, are methodologically unequipped to address the Threefold Challenge made by popular New Atheist thinkers such as Richard Dawkins, Sam Harris, Christopher Hitchens, and Daniel Dennett. The book has three primary motivations. First, it provides an interpretation of the New Atheist movement that treats their claims as philosophical arguments and not just rhetorical exercises or demagoguery. Second, it assesses and responds to these claims by elaborating four distinct contemporary philosophical perspectives: analytic philosophy, empirical philosophy, continental philosophy, and pragmatism, as well as contextualizing these perspectives in the history of the philosophy of religion. Finally, the book offers a metaphilosophical critique, returning again and again to the question of method. In the end, the author settles upon a modified version of pragmatism that he concludes is best suited for articulating the terms and stakes of the God Debate. Challenging the New Atheism will be of interest to scholars and students of American philosophy and philosophy of religion.
