Proceedings Of The IndoFrench Conference On Geometry:

Proceedings of the Indo-French Conference on Geometry S. Ramanan, Arnaud Beauville, 1993 This book contains the proceedings of a conference on geometry held in early 1989 at the Tata Institute in Bombay and organized as a joint project of French and Indian mathematicians The topics range from algebraic geometry to geometric questions arising in differential equations to connections between geometry and quadratic forms This book the second in a series of publications by the National Board for Higher Mathematics of India is intended to help set research directions and to stimulate the interest of talented students in mathematics *Integrable Systems and Algebraic Geometry: Volume 2* Ron Donagi, Tony

Shaska, 2020-04-02 Created as a celebration of mathematical pioneer Emma Previato this comprehensive book highlights the connections between algebraic geometry and integrable systems differential equations mathematical physics and many other areas The authors many of whom have been at the forefront of research into these topics for the last decades have all been influenced by Previato's research as her collaborators students or colleagues The diverse articles in the book demonstrate the wide scope of Previato's work and the inclusion of several survey and introductory articles makes the text accessible to graduate students and non experts as well as researchers The articles in this second volume discuss areas related to algebraic geometry emphasizing the connections of this central subject to integrable systems arithmetic geometry Riemann surfaces coding theory and lattice theory *Integrable Systems and Algebraic Geometry: Volume 1* Ron Donagi, Tony

Alan Adolphson, Francesco Baldassarri, Pierre Berthelot, Nicholas Katz, Francois Loeser, 2008-08-22 This two volume book collects the lectures given during the three months cycle of lectures held in Northern Italy between May and July of 2001 to commemorate Professor Bernard Dwork 1923 1998 It presents a wide ranging overview of some of the most active areas of contemporary research in arithmetic algebraic geometry with special emphasis on the geometric applications of the p -adic analytic techniques originating in Dwork's work their connection to various recent cohomology theories and to modular forms The two volumes contain both important new research and illuminating survey articles written by leading experts in

the field The book will provide an indispensable resource for all those wishing to approach the frontiers of research in arithmetic algebraic geometry *Integrable Systems and Algebraic Geometry* Ron Donagi, Tony Shaska, 2020-04-02 A collection of articles discussing integrable systems and algebraic geometry from leading researchers in the field

Compactifications of Symmetric and Locally Symmetric Spaces Armand Borel, Lizhen Ji, 2006-07-25 Noncompact symmetric and locally symmetric spaces naturally appear in many mathematical theories including analysis representation theory nonabelian harmonic analysis number theory automorphic forms algebraic geometry moduli and algebraic topology cohomology of discrete groups In most applications it is necessary to form an appropriate compactification of the space The literature dealing with such compactifications is vast The main purpose of this book is to introduce uniform constructions of most of the known compactifications with emphasis on their geometric and topological structures The book is divided into three parts Part I studies compactifications of Riemannian symmetric spaces and their arithmetic quotients Part II is a study of compact smooth manifolds Part III studies the compactification of locally symmetric spaces Familiarity with the theory of semisimple Lie groups is assumed as is familiarity with algebraic groups defined over the rational numbers in later parts of the book although most of the pertinent material is recalled as presented Otherwise the book is a self contained reference aimed at graduate students and research mathematicians interested in the applications of Lie theory and representation theory to diverse fields of mathematics **Integrable Systems and Quantum Groups** Ron Donagi, Boris Dubrovin, Edward Frenkel, Emma Previato, 2006-11-14 The aim of this CIME Session was to review the state of the art in the recent development of the theory of integrable systems and their relations with quantum groups The purpose was to gather geometers and mathematical physicists to allow a broader and more complete view of these attractive and rapidly developing fields The papers contained in this volume have at the same time the character of survey articles and of research papers since they contain both a survey of current problems and a number of original contributions to the subject Mathematics: Frontiers and Perspectives Vladimir Igorevich Arnol'd, 2000 A celebration of the state of mathematics at the end of the millennium Produced under the auspices of the International Mathematical Union IMU the book was born as part of the activities of World Mathematical Year 2000 It consists of 28 articles written by influential mathematicians Mathematical Reviews ,1995 **Index of Conference Proceedings** ,1996 *Elliptic Curves, Modular Forms & Fermat's Last Theorem* John Coates, Shing-Tung Yau, 1997 These proceedings are based on a conference at the Chinese University of Hong Kong held in response to Andrew Wiles's conjecture that every elliptic curve over \mathbb{Q} is modular The survey article describing Wiles's work is included as the first article in the present edition □□□□□□ ,1999 **Bulletin of the American Mathematical Society** ,1998 Bulletin (new Series) of the American Mathematical Society ,2007 **Catalogue** American Mathematical Society, 2000 **Mathematical Education** ,1992 *Успехи математических наук* ,2001 *International Books in Print* ,1990 **Des catégories dérivées des catégories abéliennes** Jean Louis Verdier, 1996 Proceedings in Print
