## **Proceedings Of The Thirteenth West Coast Conference On Formal Linguistics:**

**Proceedings of the ... West Coast Conference on Formal Linguistics**, Studies on Universal Grammar and Typological Variation Artemis Alexiadou, T. Alan Hall, 1997-01-01 The articles of the present volume consist of generative analyses dealing with several current topics of discussion and debate in syntactic theory such as clitics word order scrambling directionality movement The data in the volume are drawn from a number of typologically diverse languages e.g. Arabic Berber Dutch Gaelic Greek Malayalam *Lexicon in Focus* Barbara Stiebels, Dieter Wunderlich, 2015-03-30 Die Reihe publiziert Originalarbeiten zur Beschreibung und theoretischen Analyse der Struktur natürlicher Sprachen Schwerpunkt sind die Prinzipien und Regeln der grammatischen und lexikalischen Kenntnis sowohl unter einzelsprachlichen wie unter sprachvergleichenden Gesichtspunkten Abgedeckt werden alle systematischen Bereiche der Sprachwissenschaft insbesondere Phonologie Morphologie Syntax Semantik und Pragmatik unter Einbeziehung von Aspekten des Spracherwerbs des Sprachwandels der Sprachverwendung und der phonetischen und neuronalen Realisierung **Zeitschrift für Sprachwissenschaft**, 2001 Verb Constructions in German and Dutch Pieter A. M. Seuren, Gerard Kempen, 2003-01-01 German and Dutch verb constructions show a rich array of syntactic phenomena that have so far been underexposed in the literature despite the fact that they have proved to be a source of substantial problems in theoretical grammar The cross linguistic study of verb constructions and complementation has been dominated by views deriving from English or for that matter Latin The German and Dutch complementation systems however feature several important properties that are missing from English but occur in many other languages Well known but only partially understood examples are clause final verb clusters and the so called Third Construction In the present book these and related phenomena are addressed by leading representatives of various schools of linguistic thought in particular Head driven Phrase Structure Grammar HPSG Generative Grammar Lexical Functional Grammar LFG Tree Adjoining Grammar TAG Performance Grammar and Semantic Syntax By bringing together the diverse theoretical analyses into one volume the editors hope to stimulate comparative evaluations of the formalisms Themes in Arabic and Hebrew Syntax J. Ouhalla, U. Shlonsky, 2012-12-06 The aim of this enterprise is to assemble together in one volume works on various syntactic aspects of Arabic and Hebrew in the hope that it will spur further comparative work within the Semitic family at the level of richness achieved in other language families such

as Germanic and Romance Although a substantial amount of work on the syntax of Arabic and Hebrew already exists in various forms volumes of the type we have attempted are still practically non-existent Moreover apart from some notable exceptions existing studies rarely take a systematic within family comparative stance towards the phenomena they discuss although cross references between studies on Arabic and Hebrew are not uncommon Obviously we would ideally have preferred the volume to include papers on numerous other Semitic languages including the languages of the Ethio Semitic branch as well as numerous spoken varieties of Arabic that have yet to be explored Unfortunately this was not possible due to circumstances beyond our control We very much hope that the existence of this volume will make more inclusive volumes on the syntax of the Semitic languages only a matter of time

**Current Approaches to Syntax** András Kertész, Edith Moravcsik, Csilla Rákosi, 2019-05-06 Even though the range of phenomena syntactic theories intend to account for is basically the same the large number of current approaches to syntax shows how differently these phenomena can be interpreted described and explained The goal of the volume is to probe into the question of how exactly these frameworks differ and what if anything they have in common Descriptions of a sample of current approaches to syntax are presented by their major practitioners Part I followed by their metatheoretical underpinnings Part II Given that the goal is to facilitate a systematic comparison among the approaches a checklist of issues was given to the contributors to address The main headings are Data Goals Descriptive Tools and Criteria for Evaluation The chapters are structured uniformly allowing an item by item survey across the frameworks The introduction lays out the parameters along which syntactic frameworks must be the same and how they may differ and a final paper draws some conclusions about similarities and differences The volume is of interest to descriptive linguists theoreticians of grammar philosophers of science and studies of the cognitive science of science
