Microbial Processing of Metal Sulfides Edgardo R. Donati, Wolfgang Sand, 2007-05-11 The application of microbiological methods to the extraction of metals from minerals is supported by several bioleaching and biooxidation processes operating in different sites over the world This book details the basic aspects of the process with special emphasis on recent contributions regarding the chemical and microbial aspects of the bioleaching process and the use of microorganisms in the treatment of complex ores and concentrates

**Parallel Programming with Co-arrays** Robert W. Numrich, 2018-09-06 Parallel Programming with Co Arrays describes the basic techniques used to design parallel algorithms for high performance scientific computing It is intended for upper level undergraduate students and graduate students who need to develop parallel codes with little or no previous introduction to parallel computing It is also intended as a reference manual for researchers active in the field of scientific computing All the algorithms in the book are based on partition operators These operators provide a unifying principle that fits seemingly disparate techniques into an overall framework for algorithm design The book uses the co array programming model to illustrate how to write code for concrete examples but it emphasizes that the important concepts for algorithm design are independent of the programming model With these concepts in mind the reader can write algorithms in different programming models based on personal taste and comfort

*Inorganic Chemistry of the Transition Elements* B F G Johnson, 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume
