The English Catalogue of Books [annual] ,1899 Vols for 1898 1968 include a directory of publishers **The Economy of Colonial Malaya** Sivachandralingam Sundara Raja,2017-08-16 Although colonies are often viewed as having been of crucial economic importance to Britain s empire those responsible for administering the colonies were often not at all interested in or supportive of commercial ventures as this book demonstrates Based on extensive original research and including detailed case studies of the agricultural and mining sectors in late nineteenth and early twentieth century Malaya the book examines how administrators and capitalists interacted showing how administrators were often hostile to business and created barriers to business success It discusses in particular contradictory colonial government policies confusion over land grants and conflicts within bureaucratic hierarchies and outlines the impact of such difficulties including the failure to attract capital inflows and outright business failures Overall the book casts a great deal of light on the detail of how business and government actually worked in Britain s colonial empire *The Westminster Review* ,1882 Catalogue Bailey Brothers,1887 **Torch and Colonial Book Circular** ,1891 **Sessional Papers - Legislature of the Province of Ontario** Ontario. Legislative Assembly,1880 *Journal of the Royal Colonial Institute* Royal Colonial Institute (Great Britain),1897 *Publishers' circular and booksellers' record* ,1885 Annual Supplement to the Catalogue of the Library of Parliament in Alphabetical and Subject Order Canada. Library of Parliament,1904 Publishers' Circular and Booksellers' Record of British and Foreign Literature ,1885 **Photography, Natural History and the Nineteenth-Century Museum** Kathleen Davidson,2017-12-02 The Victorian era heralded an age of transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies Concurrently different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of empire This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies Australia New Zealand and to a lesser extent India Coinciding with the rise of the modern museum photography s arrival was timely and it rapidly became an essential technology for recording and publicising rare objects and

valuable collections Also during this period the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time *British Museum Catalogue of Printed Books* ,1885
