Proceedings On Moonshine And Related Topics:

Groups and Symmetries John P. Harnad, Pavel Winternitz, *Proceedings on Moonshine and Related Topics*, 2001

This volume contains the proceedings of the Moonshine workshop held at the Centre de Recherches Mathématiques CRM in Montréal. A glance at the contents will reveal that the connection of some papers to Moonshine is not immediate however Moonshine has proved to be a very fertile area and it does not stretch the imagination to believe that many more threads will be drawn together before we understand what is really going on. In this volume all the classical Moonshine themes are presented namely the Monster simple group and other finite groups automorphic functions and forms and related concepts.

Introduction to Vertex Operator Algebras and Their Representations James Lepowsky, Haisheng Li, 2012-12-06

Introduces the fundamental theory of vertex operator algebras and its basic techniques and examples. Begins with a detailed presentation of the theoretical foundations and proceeds to a range of applications. Includes a number of new original results and brings fresh perspective to important works of many other researchers in algebra, Lie theory, representation theory, string theory, quantum field theory and other areas of math and physics.

Partition Functions and Automorphic Forms Valery A. Gritsenko, Vyacheslav P. Spiridonov, 2020-07-09. This book offers an introduction to the research in several recently discovered and actively developing mathematical and mathematical physics areas. It focuses on: 1. Feynman integrals and modular functions; 2. hyperbolic and Lorentzian Kac-Moody algebras related automorphic forms and applications to quantum gravity; 3. superconformal indices and elliptic hypergeometric integrals related instanton partition functions; 4. moonshine its arithmetic aspects, Jacobi forms, elliptic genus and string theory; and 5. theory and applications of the elliptic Painlevé equation and aspects of Painlevé equations in quantum field theories. All the topics covered are related to various partition functions emerging in different supersymmetric and ordinary quantum field theories in curved space-times of different dimensions. Presenting multidisciplinary methods, localization, Borcherds' products, theory of special functions, Cremona maps etc. for treating a range of partition functions, the book is intended for graduate students and young postdocs interested in the interaction between quantum field theory and mathematics related to automorphic forms, representation theory, number theory and geometry and mirror symmetry.

Recent Developments in Lie Algebras, Groups and Representation

Theory Kailash C. Misra, Daniel Ken Nakano, Brian Parshall, 2012. This book contains the proceedings of the 2009/2011 Southeastern Lie Theory Workshop Series held October 9-11 2009 at North Carolina State University, May 22-24 2010 at the University of Georgia and June 1-4 2011 at the University of Virginia. Some of the articles written by experts in the field survey recent developments while others include new results in Lie algebras, quantum groups, finite groups and algebraic groups.

Air Transport and Operations Richard Curran, 2012. Air transport must evolve if it is to optimize its value in the 21st century. The mood in the aerospace industry is positive with regard to economic recovery but the focus in this transitional time must be on sustaining value without losing sight of environmental and safety priorities. This book presents

the proceedings of the joint conference held in Delft the Netherlands in June 2012 incorporating the 3rd International Air Transport Operations Symposium ATOS the 3rd Association of Scientific Development in Air Traffic Management in Europe ASDA Seminar the 6th International Meeting for Aviation Products Support Processes IMAPP and the 2012 Complex World Seminar The conference brought together over 200 participants from industry and academia all of whom share the common goal of improving performance and capacity by advancing the efficiency sustainability and safety of air transport Presentations at the conference were divided equally between academic papers and more applied industry sessions The book includes the majority of academic papers presented at the conference and provides a wide overview of the issues currently of importance in the world of air transport *Proceedings in Print* ,1997 *CRM Proceedings & Lecture Notes* ,2001
