Proceedings of the Fifth International Congress of Mathematicians Ernest William Hobson, Augustus Edward Hough Love, 1913 *Proceedings of the Fifth International Congress on Mathematical Education* Marjorie Carss, 1986-01-01 *Proceedings of the Sixth International Congress on Mathematical Education* Ann Hirst, Keith Edwin Hirst, 1988 *The International Commission on Mathematical Instruction, 1908-2008: People, Events, and Challenges in Mathematics Education* Fulvia Furinghetti, Livia Giacardi, 2023-01-30 The book presents the history of ICMI through a prosopographical approach In other words it pays a lot of attention to the actors of the International movement The portraits of the members of the ICMI Central Committees 1908 1936 and ICMI Executive Committees 1952 2008 and other eminent figures in ICMI history who have passed away in the first 100 years of its life are the guiding thread of the volume Each portrait includes Biographical information An outline of the various contributions made by the individual in question to the study of problems pertaining to mathematics teaching education Primary bibliography Secondary with particular attention to the publications concerning the teaching of mathematics Images photos book frontispieces relevant manuscripts The authors of the portraits 30 altogether are researchers in the history of mathematics mathematics and mathematics education The focus on the officer's role within ICMI and on his/her contributions to mathematics education make the portraits different from usual biographies In particular since most officers were active mathematicians the portraits shed light on aspects of their lesser known activity Connecting chapters place the action of these figures in the historical context and in the different phases of ICMI history *Second International Handbook of Mathematics Education* Alan Bishop, M.A. (Ken)

Clements, Christine Keitel-Kreidt, Jeremy Kilpatrick, Frederick Koon-Shing Leung, 2012-02-02 ALAN 1 BISHOP The first International Handbook on Mathematics Education was published by Kluwer Academic Publishers in 1996 However most of the writing for that handbook was done in 1995 and generally reflected the main research and development foci prior to 1994 There were four sections 36 chapters and some 150 people contributed to the final volume either as author reviewer editor or critical friend The task was a monumental one attempting to cover the major research and practice developments in the international field of mathematics education as it appeared to the contributors in 1995 Inevitably there were certain omissions some developments were only starting to emerge and some literatures were only sketchy and speculative However that Handbook has had to be reprinted three times so it clearly fulfilled a need and I personally hope that it lived up to what I wrote in its Introduction The Handbook thus attempts not merely to present a description of the international state of the field but also to offer synthetic and reflective overviews on the different directions being taken by the field on the gaps existing in our present knowledge on the current problems being faced and on the future possibilities for development Bishop et al 1996 Since that time there has been even more activity in our field and now seems a good time to take stock again to reflect on what has happened since 1995 and to create a second Handbook with the same overall goals *Proceedings of the ... International Conference for the Psychology of Mathematics Education*, 1987 *Oxford's Sedleian Professors of Natural Philosophy* Christopher Hollings, Mark McCartney, 2024-02-08 This edited volume traces the varied history of Oxford's Sedleian Professorship of Natural Philosophy through the first four centuries of its existence combining contributions from historians of medicine science mathematics and universities with personal reminiscences of some of the more recent holders of the post **MU, Der Mathematikunterricht**, 1992 **International mathematical news**, 1989 *Briefstagebuch zwischen Max Planck, Carl Runge, Bernhard Karsten und Adolf Leopold* Klaus Hentschel, Renate Tobies, 1999
