Personal Writing Portfolio:

Personal Writing Portfolio Christine Edwards, Catriona Morrison, 1999 **Writing Portfolios in the Classroom** Robert Calfee, Pamela Perfumo, 2012-10-12 This volume presents chapters by researchers practitioners and policymakers who study the impact of classroom portfolios in the assessment of writing achievement by elementary and middle grade students The focus throughout the volume is on the tension between classroom assessment and externally mandated testing It presents the efforts of researchers practitioners and policymakers to understand the impact of classroom portfolios for the assessment of writing achievement by elementary and middle grade students Under the auspices of the Center for the Study of Writing the editors conducted a national survey of exemplary portfolio projects arranged for a series of video visits and held several working conferences The result of this work is a broad ranging tale the aspirations of teachers and administrators to move the machinery of schooling in the direction of more authentic and engaging tasks the puzzlement of students when they realize that the assignments are real and that the teacher may not have a right answer in mind and the tensions between ivory tower ideas and everyday classroom practice Divided into four sections this research volume provides a historical perspective develops the conceptual framework that serves as a background for many activities described throughout and discusses numerous practical issues that confront today s researchers and practitioners views the phenomenon of writing portfolios through a variety of broadview lenses such as teacher enthusiasm student reflection assessment tension the portfolio as metaphor and the locus of control conveys important conceptual issues with a balance toward pragmatics and offers unique insights from the perspective of one individual who serves as scholar researcher and Inside the Writing Portfolio Carol Brennan Jenkins, 1996 Inside the Writing Portfolio addresses the primacy of teacher teacher knowledge in the portfolio process It seeks to answer such questions as What do we need to know in order to assess the personal narratives stories and nonfiction pieces that children choose for their portfolios How do we mark their progress What do we need to know to assess the conventions of spelling punctuation and handwriting How do we assess children's self assessment insights and their goals for future learning Jenkins makes the case for the collaborative portfolio one that merges the selections reflections and goals of both the child and the teacher She takes the stance that if portfolio assessment is to stand as a viable alternative to standardized measures it is essential to capture the insights of both child and teacher in order to illuminate the full extent of a child's learning past present and future Jenkins walks us through the collaborative portfolio of third grader Shane and then follows his progress through grades four and five Research findings are presented in conjunction with Shane's writing record writing samples excerpts from his interviews and surveys and other materials Jenkins also analyzes additional work from younger and older children to illustrate the development of writing across a broad age range She completes the assessment picture with writing samples from home highlighting the expansive nature of literacv Handbook of Instructional Practices for Literacy Teacher-educators Joyce E. Many, 2001-01-01 This volume offers

a unique glimpse into the teaching approaches and thinking of a wide range of well known literacy researchers and the lessons they have learned from their own teaching lives The contributors teach in a variety of universities programs and settings Each shares an approach he or she has used in a course and introduces the syllabus for this course through personal reflections that give the reader a sense of the theories prior experiences and influential authors that have shaped their own thoughts and approaches In addition to describing the nature of their students and the program in which the course is taught many authors also share key issues with which they have grappled over the years while teaching their course others discuss considerations that were relevant during the preparation of this particular syllabus or describe how it evolved in light of student input The book is organized by areas within literacy education reading English language arts literature emergent literacy content area literacy literacy assessment and instruction literacy and technology and inquiries into literacy theory and classroom practice It is accompanied by an interactive Web site http msit gsu edu handbook This online resource provides additional information about the authors courses including complete syllabi recommended readings grading rubrics and sample assignments Readers are invited to respond and contribute their own syllabi and teaching experiences to the **The Testing Trap** George Hillocks, 2002-04-12 Do statewide assessments really do discourse generated by the volume what they are supposed to do Through interviews with over three hundred teachers and administrators Hillocks examines whether state writing tests in Illinois Kentucky Oregon New York and Texas actually improve students ability to express their thinking in writing Ultimately Hillocks argues that the majority of existing tests actually have a harmful effect on the way students are taught to write In addition to providing analyses of assessments that do not encourage good writing The Testing Trap contrasts them to those that do Concluding with practical procedures for examining and evaluating writing assessments this book is a provocative and essential read for administrators teachers policymakers parents and all who care about the Governmentality Studies in Education ,2009-01-01 Michel Foucault's concept of education of our children governmentality originated in a lecture series in the late 1970s at the Coll ge de France and soon became the basis for a range of historical and contemporary studies across the social sciences and humanities The concept in part rests on a simple but powerful idea that links government to the freedom of the subject in a novel understanding of liberal politics It also provides an analytics of power based on the examination of actual practices This is the first collection to use Foucault s concept in relation to the field of education where it has a natural home given that much educational theory and practice in the liberal tradition at least since Kant has been directed at the goals of autonomy and self government The volume has three sections a general section on Foucault and governmentality with contributions from some of the world's leading scholars in the area including Colin Gordon Jacques Donzelot and Thomas Lemke and two sections devoted to governmentality and education the first outlining Anglo American perspectives the second focusing on European perspectives with contributions from leading scholars such as Tom Popkewitz James Marshall Tom Osborne Michael Peters Mark Olssen Tina Besley
