Personality Structure and Human Interaction HARRY Y. GUNTRIP, Taylor & Francis Group, 2019-07-10

Personality Structure and Human Interaction Harry Guntrip, 1995 How has a theory of man as a social being to be formulated if we are to do justice to his individuality to the subtle ways in which his love and hate compete within his relations with others and to the anxieties and resistances he shows when he seeks to change himself To answer this question is the task which the author sets himself After assessing Freud's basic principles the author proceeds to make a uniquely comprehensive review of subsequent theoretical contributions to psychoanalysis with special emphasis on the work of Fairbairn and Melanie Klein From a background of philosophy theology and social studies the author went on to take a personal psychoanalysis and to become a full time psychotherapist and it is from this combination of wide knowledge and intensive work with people beset by conflicts in their relations with themselves and others that he evolves his views

Personality Structure and Human Interaction Harry Guntrip, 2017-09-16 Excerpt from *Personality Structure and Human Interaction The Developing Synthesis of Psycho Dynamic Theory* T H I S book is not intended to be a history of psycho analytical theory In any complete form that would be a far larger undertaking Many important aspects of theory here omitted would have called for inclusion particularly in the case of Freud and Melanie Klein I have attempted something different something that I believe needs to be done at about this time something that arises as a problem out of the very nature of science as hitherto understood as soon as it comes to be applied to human beings This involves making a historical survey and I have sought to let the important writers speak for themselves The justification for fairly frequent quotations and some lengthy ones must be found in this deliberate purpose But such a survey would be mere mechanical hackwork more or less complete recording unless the writer felt he could trace the emergence of deeper understanding along certain definite lines The close study of psycho analysis over many years against the background of philosophical religious literary and social

studies has bred in me the conviction that here at last and here alone scientific enquiry has come face to face with the intimate and fully personal life of man This constitutes as big a test for science as for man Science has to discover whether and how it can deal with the person the unique individual we will dare to say the spiritual self with all the motives values hopes fears and pur poses that constitute the real life of man and make a purely organic approach to man inadequate On the other hand man has to face the most penetrating searchlight focussed upon his essential nature and must find out how to adjust to the stripping off of his psychic defences and self deceptions built up to hide failures in development towards maturity while the struggle to cope with living in spite of immaturity is carried on About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
