Perspectives In International Economic Law:

New Voices and New Perspectives in International Economic Law John D. Haskell, Akbar Rasulov, 2019-12-10 This book brings together a series of contributions by international legal scholars that explore a range of subjects and themes in the field of international economic law and global economic governance through a variety of methodological and theoretical lenses. It introduces the reader to a number of different ways of constructing and approaching the study of international economic law. The book deals with a series of different theoretical agendas and perspectives ranging from the more traditional empirical legal studies to the more alternative language theory and it expands the scope of substantive discussion and thematic coverage beyond the usual suspects of international trade, international investment and international finance. While the volume still gives due recognition to the traditional theoretical project of international economic law, it invites the reader to extend the scope of disciplinary imagination to other less commonly acknowledged questions of global economic governance such as food security, monetary unions and international economic coercion. In addition to historically focused and critical perspectives, the volume also includes a number of programmatic and forward looking explorations which makes it appealing to a broad audience with a variety of contrasting interests. Therefore the volume is of particular interest to academics and postgraduate students in the fields of international law, international relations, international political economy and international history.

Perspectives in International Economic Law Asif Qureshi, 2002-02-12 Economic activity Professor Qureshi insists is a visible manifestation of the human condition. The laws that regulate it and develop its norms must be deeply human. International economic law must be ever vigilant in its efforts to represent the economic needs of all strata of humanity. It must not allow the cultural imperatives of any one group to predominate. To investigate the validity of this deeply held conviction in May 2001 Professor Qureshi and the University of Manchester School of Law brought together a conference of major IEL scholars to elicit as broad a diversity of perspectives as possible. This book well informed in its insight and far reaching in its implications grew out of that conference. Issues and topics that arise in the course of the investigation include globalisation and its institutions, the survival of the nation state, the role of the International Court of Justice, sustainable development, developing countries and dispute settlement, developing countries and trade negotiations, regional integration, human rights and the untouchability of IEL and the gender bias of basic IEL institutions and rules. There are also clear presentations of specifically Marxist and Islamic perspectives and an analysis along lines of fairness as developed by Thomas Franck and John Rawls. *Perspectives in International Economic Law* offers lawyers, economists, political scientists and policymakers a multifaceted multidisciplinary approach to one of the most vitally important human endeavours of our time. While its immediate value and utility is apparent, the depth of clear thinking it evinces on every page will keep it current for many years to come.

International Economic Law Won-mog Choi, 2015-09-10 This book assesses the past 20 years of development of international economic law in time for the WTO's 20th Anniversary and forecasts the future of

international economic law This edited volume brings together experts in the Asia Pacific region from a range of backgrounds to provide perspectives on many issues that arise from the international economic law experience focusing on its legal significance and likely impact on multilateralism The past two decades have seen a significant proliferation of regional trade agreements and a lack of multilateral governance of finance around the world How to respond to these challenges and how to reform the WTO jurisprudence and process to co ordinate global and regional mechanisms have become compelling questions for large scale discussions and systemic analysis This book provides vital insights into just how to improve multilateral trading governance and to recalibrate international economic law in the twenty first century European Yearbook of International Economic Law 2016 Marc Bungenberg, Christoph Herrmann, Markus Krajewski, Jörg Philipp Terhechte, 2016-07-16 Volume 7 of the EYIEL focusses on critical perspectives of international economic law Recent protests against free trade agreements such as the Transatlantic Trade and Investment Partnership TTIP remind us that international economic law has always been a politically and legally contested field This volume collects critical contributions on trade investment financial and other subfields of international economic law from scholars who have shaped this debate for many years The critical contributions to this volume are challenged and sometimes rejected by commentators who have been invited to be critical with the critics The result is a unique collection of critical essays accompanied by alternative and competing views on some of the most fundamental topics of international economic law In its section on regional developments EYIEL 7 addresses recent megaregional and plurilateral trade and investment agreements and negotiations Short insights on various aspects of the Transpacific Partnership TPP and its sister TTIP are complemented with comments on other developments including the African Tripartite FTA und the negotiations on a plurilateral Trade in Services Agreement TiSA Further sections address recent WTO and investment case law as well as recent developments concerning the IMF UNCTAD and the WCO The volume closes with reviews of recent books in international economic law
