Mead Hans Joas, 1997-09-16 This major study reassesses the work of the American pragmatist George Herbert Mead 1863 1931 which had a significant impact in fields ranging from metaphysics and ethics to sociology and social psychology The work of American pragmatist George Herbert Mead 1863 1931 had a strong influence in fields ranging from metaphysics and ethics to sociology and social psychology In this book Hans Joas interweaves Mead's political and intellectual biography with the development of his theories The key concept of the study is practical intersubjectivity a term Joas introduces to characterize the link implicit in Mead's work between a theory of intersubjectivity and a theory of praxis Throughout the book Joas stresses the practical social and political nature of Mead's work Besides comparing Mead to the other American pragmatists Joas discusses the relation between Mead's thought and that of such Europeans as Habermas Apel Husserl Merleau Ponty and Piaget Joas's revisionist portrait of Mead as a socially engaged intellectual with its emphasis on his relevance for contemporary philosophy and social science has been a key factor in the revival of interest in Mead The author's new preface includes an update on pragmatism studies in general and on Mead studies in particular

Perspectives on Time Jan Faye, Uwe Scheffler, Max Urchs, 1996-11-30 Perspectives on Time deals with the problem of time from different perspectives such as logic physics and philosophy It contains 18 previously unpublished papers written by philosophers from various European countries as well as a large introduction about the history and the main situation in the respective fields today The prominent issues which are addressed in this book concern the direction of time the reality of time the objectivity of becoming the existence in time and the logical structures of reasoning about time The papers have been written based on different approaches partly depending on whether the authors subscribe to an A theory or a B theory of time Audience Due to the broad variety of approaches the book contains important contributions both for philosophers philosophers of science logicians and for scientists working in the field of language and AI *Resources in Education*, 1996

Journal of Leisure Research, 1994 **The Oceania Monographs**, 1985 *Sound in the Ecstatic-Materialist Perspective on Experimental Music* Riccardo D. Wanke, 2021-08-09 What does a one hour contemporary orchestral piece by Georg Friedrich Haas have in common with a series of glitch noise electronic tracks by Pan Sonic This book proposes that despite their differences they share a particular understanding of sound that is found across several quite distinct genres of contemporary art music the ecstatic materialist perspective Sound in the ecstatic materialist perspective is considered as a material mass or element unfolding in time encountered by a listener for whom the experience of that sound exceeds the purely sonic without becoming entirely divorced from its materiality It is material by virtue of the focus on the texture consistency and density of sound it is ecstatic in the etymological sense that is to say that the experience of this sound involves an instability an inclination to depart from material appearance an ephemeral and transitory impulse in the very perception of sound to something beyond but still related to it By examining musical pieces from spectralism to

electroacoustic domains from minimalism to glitch electronica and dubstep this book identifies the key intrinsic characteristics of this musical perspective To fully account for this perspective on sonic experience listener feedback and interviews with composers and performers are also incorporated Sound in the ecstatic materialist perspective is the common territory where composers sound artists performers and listeners converge

Context-Dependence in the Analysis of Linguistic Meaning Hans Kamp, Barbara Partee, 2021-10-01 Does context and context dependence belong to the research agenda of semantics and specifically of formal semantics Not so long ago many linguists and philosophers would probably have given a negative answer to the question However recent developments in formal semantics have indicated that analyzing natural language semantics without a thorough accommodation of context dependence is next to impossible The classification of the ways in which context and context dependence enter semantic analysis though is still a matter of much controversy and some of these disputes are ventilated in the present collection This book is not only a collection of papers addressing context dependence and methods for dealing with it it also records comments to the papers and the authors replies to the comments In this way the contributions themselves are contextually dependent In view of the fact that the contributors to the volume are such key figures in contemporary formal semantics as Hans Kamp Barbara Partee Reinhard Muskens Nicholas Asher Manfred Krifka Jaroslav Peregrin and many others the book represents a quite unique inquiry into the current activities on the semantics side of the semantics pragmatics boundary
