Persuasive Encounters Gary C. Woodward, 1990-11-09 In today's world of instant communication we often marvel at the ability of a public figure to handle a hostile audience Persuasive Encounters studies successful persuasion against tough odds Through the analyzation of specific historical and rhetorical evidence the events presented here illustrate and sometimes challenge the viability of current abstract models Detailed studies of encounters involving such diverse figures as Edward R Murrow Edward Kennedy Thomas Szasz and Ed Koch form the basis of the work Shorter analyses focus on the sometimes controversial actions of social activists ranging from abolitionist Wendell Phillips to the Beatles John Lennon In its scope and assumptions the book is the first of its kind Such studies are usually isolated in journals or reduced to short examples in persuasion texts Persuasive Encounters demonstrates that the understanding of communication processes can never be very far from the analysis of specific settings and events It goes on to show that confrontations can be positive forces for change The text is comprised of five instances of persuasion advocacy combined with six shorter case studies Each chapter includes background information on the immediate and secondary audiences a summary of significant events that surrounded the situation and contemporary accounts of public reaction In addition a transcript of the remarks or exchanges that actually took place and an analysis of the persuasion are provided Students of persuasion communication theory and discourse analysis will find this work a valuable resource

A Theory of Contemporary Rhetoric Richard Andrews, 2013-08-22 A Theory of Contemporary Rhetoric describes explains and argues the overarching theory of contemporary rhetoric This current view of rhetoric brings together themes in the communication arts including political literary criticism bi and multi lingualism multimodality framing as an artistic and sociological device for composition and interpretation literacy in the digital age and the division between fiction and non fiction in language literature studies Chapters explore the implications of rhetoric for particular aspects of the field Discussions throughout the book provide illustrations that ground the material in practice As an overarching theory in the communication arts rhetoric is elegant as a theoretical solution and simple as a practical one It asks such questions as who is speaking writing composing to whom why

what is being conveyed and how is it being conveyed Acknowledging the dirth of recent works addressing the theory of rhetoric this book aims to fill the existing theoretical gap and at the same time move the field of language literature studies forward into new territory It provides the keynote theoretical guide for a generation of teachers teacher educators and researchers in the fields of English as a subject English as a second foreign or additional language and language study in general

Socializing States Ryan Goodman,Derek Jinks,2013-08-20 The role of international law in global politics is as poorly understood as it is important But how can the international legal regime encourage states to respect human rights Given that international law lacks a centralized enforcement mechanism it is not obvious how this law matters at all and how it might change the behavior or preferences of state actors In *Socializing States* Ryan Goodman and Derek Jinks contend that what is needed is a greater emphasis on the mechanisms of law s social influence and the micro processes that drive each mechanism Such an emphasis would make clearer the micro foundations of international law This book argues for a greater specification and a more comprehensive inventory of how international law influences relevant actors to improve human rights conditions Substantial empirical evidence suggests three conceptually distinct mechanisms whereby states and institutions might influence the behavior of other states material inducement persuasion and what Goodman and Jinks call acculturation The latter includes social and cognitive forces such as mimicry status maximization prestige and identification The book argues that 1 acculturation is a conceptually distinct empirically documented social process through which state behavior is influenced and 2 acculturation based approaches might occasion a rethinking of fundamental regime design problems in human rights law This exercise not only allows for reexamination of policy debates in human rights law it also provides a conceptual framework for assessing the costs and benefits of various design principles While acculturation is not necessarily the most important or most desirable approach to promoting human rights a better understanding of all three mechanisms is a necessary first step in the development of an integrated theory of international law s influence *Socializing States* provides the critical framework to improve our understanding of how norms operate in international society and thereby improve the capacity of global and domestic institutions to build cultures of human rights
