Prealgebra Daniel J. Bach, Patricia J. Leitner, 2006 Bach Leitner's progressive text lays a solid foundation for elementary algebra that carefully addresses student needs. The authors' clear, non-intimidating and humorous style reassures math-anxious readers. Unlike workbook format, *Prealgebra* texts that stress competence at procedures; this text emphasizes understanding and mastery through careful, step-by-step explanations that strengthen students' long-term abilities to conceptualize and solve problems. The text's innovative sequencing builds students' confidence with arithmetic operations early on, before extending the basic concepts to algebraic expressions and equations. The authors' unusually thorough introduction to variables eases students through the crucial transition from working with numbers. Throughout the text, interesting applied examples and exercises and math appreciation features highlight key concepts at work in a wide variety of real-world contexts.

Prealgebra with Mathzone Donald Hutchison, James Streeter, Barry Bergman, 2004-08 *Pre-Algebra* extends the successful Streeter-Hutchison-Bergman-Hoelzle series of developmental mathematics worktexts to another course. The book combines Streeter's popular pedagogy, including active learning backed by Check Yourself exercises, with an Early Equations approach to pre-algebra. Beginning in chapter 1, students are gradually exposed to key algebraic concepts such as variables and equations. The worktext is accompanied by numerous useful supplements, including a smart CD-ROM, videos, and a website.
