Predication Theory A Case Study For Indexing Theory:

Predication Theory Donna Jo Napoli, 1989-05-11 In this study Donna Jo Napoli takes a common sense approach to the notions of argument and predicate. Discussions of predication within Government and Binding theory have stressed the configurational properties of the phrases involved and Napoli argues that this has led to proposals for more and more elaborate syntactic structures that nevertheless fail to provide genuinely explanatory accounts. She presents a convincing case for viewing the notion of predicate as a semantic primitive which cannot be defined by looking simply at the lexicon or simply at the syntactic structure and offers a theory of predication where the key to the subject predicate relationship is theta role assignment. The book then goes on to offer principles for the coindexing of a predicate with its subject role player. These coindexing principles make use of Chomsky's 1986 notion of barriers but instead of being sensitive to configurational notions like c-command and governing category Napoli argues that they are sensitive to thematic structure. In the final chapter of the book Napoli extends the principles for predication coindexing to anaphor binding by introducing the notion of argument ladders.

Verbklassifizierung und aspektuelle Alternationen im Englischen Anja Wanner, 2017-12-04 Diese Studie befaßt sich mit der Lizenzierung und Realisierung von Argumenten englischer Verben. Ausgangspunkt ist die These, daß sich das syntaktische Verhalten von Verben weitgehend aufgrund der semantischen Repräsentation der Verben im Lexikon voraussagen läßt. projectional approach Problematisch für diesen Ansatz ist, daß Verben in semantisch aspektueller und syntaktischer Hinsicht elastisch sind. z.B. treten intransitive Verben wie smile mit Objekt auf smile one's approval oder sogar in einer Resultativ Konstruktion smile oneself breathless. Es wird gezeigt, daß Elemente in Argumentpositionen nicht in der semantischen Repräsentation verankert sein müssen, sondern auch als aspektuelle Argumente lizenziert sein können. Dies gilt z.B. für cognate objects, die wie alle DPs kasusmarkiert werden müssen. Im ersten Teil der Arbeit werden Testverfahren zur Klassifizierung von Verben auf verschiedenen Ebenen: semantisch, aspektuelle, Struktur, Argumentstruktur, Syntax etabliert. Ein wichtiger Punkt ist dabei die Unterscheidung von unergativen und unakkusativen Verben. Im zweiten Teil werden Linking Theorien im Rahmen der generativen Grammatik kritisch diskutiert. Als Alternative zu gängigen Ansätzen wird ein Linking Modell skizziert, das sich an den Grundsätzen der Optimality Theory orientiert. Linking rules werden als constraints formuliert, die einander widersprechen können. Der syntaktische Status eines Arguments wird durch die für eine Einzelsprache spezifische Hierarchie der linking rules ranking determiniert. Auf dieser Grundlage erfolgt im dritten Teil die Analyse von Argument Alternationen, Resultativ Konstruktion, Kausativ Alternation, Passiv und Verbklassen: psych verbs, verbs of movement, die für den strengen Projektansatz als problematisch gelten.

Enriched Composition and Inference in the Argument Structure of Chinese Ren Zhang, 2005-10-20 As with many

other languages Mandarin Chinese exhibits a rich variety of ways in expressing the arguments of the predicator in a sentence Unlike other languages such variation is typically devoid of any formal marking Previous attempts in explaining such phenomena usually focus on the syntax as an explanatory tool This book argues that a large majority of such argument structure phenomena are better accounted for by recourse to enriched representations in lexical semantics Drawing insights from conceptual semantics cognitive semantics Generative Lexicon construction grammar and formal syntax this book constitutes the first attempt at a comprehensive account of lexical semantic issues in Mandarin Chinese **Deutsch im**
