Personality and Product Symbolism Warren S. Martin,1973 *Cross-Cultural Brand Personality and Brand Desirability* Corinna Colette Vellnagel,2020-08-13 This research proposes and empirically tests the impact of brand personality dimensions on brand desirability in a cross cultural context Further the concept of brand self congruity is tested on its mediating role between brand personality dimensions and brand desirability The results reveal that certain brand personality dimensions can have a direct and or indirect impact on brand desirability Yet this effect mechanism has not only been found to be brand dependent but also culture dependent In this context the mediating role of brand self congruity was confirmed across all cultures and brands investigated Important implications are derived for research and brand management In different countries different brand personality dimensions lead to brand desirability Therefore brand managers should know their markets understand cultural differences and adjust their brand strategy accordingly in order to attain brand desirability **Handbook of Research on Trends in Product Design and Development: Technological and Organizational Perspectives** Silva, Arlindo,Simoes, Ricardo,2010-07-31 This book provides a detailed view on the current issues trends challenges and future perspectives on product design and development an area of growing interest and increasingly recognized importance for industrial competitiveness and economic growth Provided by publisher
