Breisch,Alison K. Hoagland,2005 Selected articles originally presented at the Vernacular Architecture Forum conference in Duluth Minnesota 2002 and Newport Rhode Island 2001 **Invitation to Vernacular Architecture** Thomas Carter,Elizabeth Collins Cromley,2025-12-08 Invitation to Vernacular Architecture A Guide to the Study of Ordinary Buildings and Landscapes is a manual for exploring and interpreting vernacular architecture the common buildings of particular regions and time periods Thomas Carter and Elizabeth Collins Cromley provide a comprehensive introduction to the field Proposing a methodology Invitation to Vernacular Architecture provides a systematic approach to vernacular architecture fieldwork The authors walk readers through the process of examining and documenting a building explaining in detail how to define a research area and create a research plan They guide students step by step in how to take accurate measurements of sites and of building exteriors and interiors and explain what to look for at each level They show how to find patterns and how to organize information to yield sound interpretations of buildings meanings As a complement to this practical approach Carter and Cromley present current scholarship on vernacular architecture and explain the need for a broad theoretical perspective They show how analysis of facts related to a building can reveal important insights into the behavior and culture of people who lived in a certain area at a certain time The authors then present a single ordinary house as a case study to explore the different points of view that scholars have brought to the study of vernacular architecture Rich with illustrations and written in a clear and jargon free style Invitation to Vernacular Architecture is an ideal text for courses in architecture material culture studies historic preservation American studies and history and a useful guide for anyone interested in the built environment *People, Power, Places* Sally Ann McMurry,Annmarie Adams,2000 From workers cottages in Milwaukee s Polish community to Alaskan homesteads during the Great Depression from early American retail stores to nineteenth century prisons different types of buildings reflect the diverse responses of people to their architectural needs Through inquiry into such topics the contributors to this volume examine a variety of building forms as they assess the current state of vernacular architecture studies Because scholars in vernacular architecture have come to consider thematic questions rather than simply to look at types of structures the essays chosen for this collection address issues of how people power and places intersect They demonstrate not only the inextricable links between people and place but also show how power relationships are defined by spatial organization and how this use of space has helped define the distinction between private and public The essays examine a wide range of forms from camp meetings to trolley cottages to

consider what buildings might reveal about their makers users and even interpreters One article for example will give readers a new appreciation of balloon framing in Midwest farmhouses refuting popular notions that it was a single individual's invention Another considers servants quarters in Apartheid era South Africa to explore the relationship between black domestic workers and their white employers Drawn from the Vernacular Architecture Forum conferences of 1996 and 1997 these thirteen essays make significant contributions to the study of design and building processes and the adaptation of architectural forms and spaces over time They help redefine the scope of vernacular and provide new models for better understanding the built environment The Editors Sally McMurry is professor of history at Pennsylvania State University and author of *Families and Farmhouses in Nineteenth Century America* Annmarie Adams is associate professor of architecture at McGill University and author of *Architecture in the Family Way Doctors Houses and Women 1870 1900* *Constructing Image, Identity, and Place: Perspectives in Vernacular Architecture, IX*, 2003 *Vernacular Architecture Newsletter*, 1998

Special Issue: Storied Spaces Michael Joseph Chiarappa, Gabrielle Anna Berlinger, 2020 **Material Culture** Kenneth L. Ames, 1985 **Handbook of Material Culture** Chris Tilley, Webb Keane, Susanne Kuechler, Mike Rowlands, Patricia Spyer, 2006-01-05 The study of material culture is concerned with the relationship between persons and things in the past and in the present in urban and industrialized and in small scale societies across the globe The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things It is cutting edge rather than simply reviewing the field as it currently exists It also attempts to chart the future the manner in which material culture studies may be extended and developed The Handbook of Material Culture is divided into five sections Section I maps material culture studies as a theoretical and conceptual field Section II examines the relationship between material forms the human body and the senses Section III focuses on subject object relations Section IV considers things in terms of processes and transformations in terms of production exchange and consumption performance and the significance of things over the long term Section V considers the contemporary politics and poetics of displaying representing and conserving material and the manner in which this impacts on notions of heritage tradition and identity The Handbook charts an interdisciplinary field of studies that makes an unique and fundamental contribution to an understanding of what it means to be human It will be of interest to all who work in the social and historical sciences from anthropologists and archaeologists to human geographers to scholars working in heritage design and cultural studies **Vernacular Buildings** Allen Noble, 2013-11-27 Constancy permits the evolution of types and characteristics to be identified even in widely spread locations It helps trace the origins of structures despite later modifications And change allows one to trace the effects of difference in environment fashion cultural ideas and economic influences Change and constancy operate together although one may or other may dominate at a particular time and place In *Vernacular Buildings* Allen Noble extends the global survey contained in his earlier highly successful *Traditional Buildings* to

cover vernacular buildings and dwellings around the world In a truly comprehensive account he ranges from the fazenda of the pioneer Brazilian settlers the Masai dwellings of Tanzania and the gothic houses of Shanghai to Virginia Hall and Parlor houses the thatched dwellings of the Eifel region of Germany and the three decker houses of New York Acknowledging the value of archival research the author is also firmly convinced of the importance of field observation and the book is extensively illustrated with photographs from his own personal collection With a comprehensive bibliography and incorporating new material from cultural geographers historians folklorists and anthropologists Vernacular Buildings is a unique survey that will be welcomed by specialists and enthusiasts alike *Red Lodge and the Mythic West* Bonnie Christensen, 2002 Tracing the story of Red Lodge from the 1880s to the present Christensen tells how a mining town managed to endure the vagaries of the West's unpredictable extractive industries economy She connects Red Lodge to a myriad of larger events and historical forces to show how national and regional influences have contributed to the development of local identities exploring how and why westerners first rejected and then embraced western images and how ethnicity wilderness and historic preservation became part of the identity that defined one town BOOK JACKET

Vernacular Architecture Newsletter, 1995 The Routledge Handbook of Architecture and Anthropology Marie Stender, Claus Bech-Danielsen, Aina Landsverk Hagen, Madlen Kobi, Ying Zhou, 2025-11-28 This handbook provides fresh insights into the debates and challenges that unfold in the cross disciplinary field of architecture and anthropology Based on studies of empirical contexts across the globe the authors launch and test a broad variety of methods and advance various theoretical concepts Architecture and anthropology have always had overlapping interests but a range of developments in both areas make it more relevant than ever to intersect overlap combine or even merge the two disciplines In anthropology the spatial material and nonhuman turns have paved the way for an increasing interest in and need for of changing the world rather than just studying it On the other hand architecture beyond designing structures has become interested in the uses and processes that unfold in during and after construction The contemporary research and practices in both disciplines are testimonies that a cross disciplinary exchange is inspiring for engaging with and responding to the challenges of a world in ecological societal and political turmoil This handbook addresses established scholars students and practitioners alike by outlining contemporary developments and tensions at the intersection of architecture and anthropology *Journal of Early Southern Decorative Arts*, 2002 New Orleans in the Atlantic World William Boelhower, 2013-09-13 The thematic project New Orleans in the Atlantic World was planned immediately after hurricane Katrina and focuses on what meteorologists have always known the city's identity and destiny belong to the broader Caribbean and Atlantic worlds as perhaps no other American city does Balanced precariously between land and sea the city's geohistory has always interwoven diverse cultures languages peoples and economies Only with the rise of the new Atlantic Studies matrix however have scholars been able to fully appreciate this complex history from a multi disciplinary multilingual and multi scaled perspectivism In this book

historians geographers anthropologists and cultural studies scholars bring to light the atlanticist vocation of New Orleans and in doing so they also help to define the new field of Atlantic Studies This book was published as a special issue of Atlantic Studies
