Creating a Tech Prep Curriculum Walter Edling, 1992 Toward a New Science of Educational Testing and Assessment Harold Berlak, Fred M. Newmann, Elizabeth Adams, Doug A. Archbald, Tyrell Burgess, John Raven, 1992-02-06 The authors of this book question the assumptions of the psychometric paradigm that underlie virtually all criterion referenced and standardized tests used in North American schools They make a compelling case for a new science of educational testing and assessment one that shifts decision making from central administration to individual schools and communities Harold Berlak argues that the concept of tests as scientific instruments validated by technical experts is anachronistic and self contradictory He makes a case for a contextual paradigm an approach which assumes that consensus on educational goals and national testing programs is neither possible nor desirable Assessment practices in a democratic society must acknowledge and affirm differences in values beliefs and material interests among individuals and groups over the purposes and practices of schooling

Schaum's Outline of Trigonometry Robert E. Moyer, 1998-12-21 Updated to match the

emphasis in today's courses this clear study guide focuses entirely on plane trigonometry It summarizes the geometry properties and theorems that prove helpful for solving trigonometry problems Also where solving problems requires knowledge of algebra the algebraic processes and the basic trigonometric relations are explained carefully Hundreds of problems solved step by step speed comprehension make important points memorable and teach problem solving skills Many additional problems with answers help reinforce learning and let students gauge their progress as they go
