Precognition and the Philosophy of Science Bob Brier, 1974 *The Philosophy of Parapsychology* Betty Shapin, Lisette Coly, 1977 *Parapsychology, Philosophy, and Spirituality* David Ray Griffin, 1997-01-01 Examines why parapsychology has been held in disdain by scientists philosophers and theologians explores the evidence for ESP psychokinesis and life after death and suggests that these phenomena provide support for a meaningful postmodern spirituality *The Journal of Parapsychology* Joseph Banks Rhine, Charles Edward Stuart, William McDougall, 1980

Encyclopedia of Philosophy Donald M. Borchert, 2006 This volume covering entries from Oakeshott Michael to Presupposition presents articles on Eastern and Western philosophies medical and scientific ethics the Holocaust terrorism censorship biographical entries and much more **Journal of the Society for Psychical Research** Society for Psychical Research (Great Britain), 1998 **Philosophia Naturalis**, 1994 **Consciousness Unbound** Edward F. Kelly, Paul Marshall, 2021-03-16 Building on the groundbreaking research of Irreducible Mind and Beyond Physicalism Edward Kelly and Paul Marshall gather a cohort of leading scholars to consider the significance of extraordinary experiences for our understanding of reality Currently emerging as a middle ground between warring fundamentalisms of religion and science an expanded science based understanding of nature finally accommodates empirical realities of spiritual sorts while also rejecting rationally untenable overbeliefs The vision sketched here provides an antidote to the prevailing postmodern disenchantment of the world and demeaning of human possibilities It not only more accurately and fully reflects our human condition but engenders hope and encourages ego surpassing forms of human flourishing It offers reasons for us to believe that freedom is real that our human choices matter and that we have barely scratched the surface of our human potentials It also addresses the urgent need for a greater sense of worldwide community and interdependence a sustainable ethos by demonstrating that under the surface we and the world are much more extensively interconnected than previously recognized **Divine Foreknowledge and Human Freedom** William Lane Craig, 1991 The ancient problem of fatalism more particularly theological fatalism has resurfaced with surprising vigour in the second half of the twentieth century Two questions predominate in the debate 1 Is divine foreknowledge compatible with human freedom and 2 How can God foreknow future free acts Having surveyed the historical background of this debate in *The Problem of Divine Foreknowledge and Future Contingents* from Aristotle to Suarez Brill 1988 William Lane Craig now attempts to address these issues critically His wide ranging discussion brings together a thought provoking array of related topics such as logical fatalism multivalent logic backward causation precognition time travel counterfactual logic temporal necessity Newcomb's Problem middle knowledge and relativity theory The present work serves both as a useful survey of the extensive literature on theological fatalism and related fields and as a stimulating assessment of the possibility of divine foreknowledge of future

free acts *ESP and Psychokinesis* Stephen E. Braude, 1979 This work was the first sustained philosophical study of psychic phenomena to follow C D Broad's *LECTURES ON PSYCHICAL RESEARCH* written nearly twenty years earlier The author clearly defines the categories of psychic phenomena surveys the most compelling experimental data and traces their implications for the philosophy of science and the philosophy of mind He considers carefully the abstract presuppositions underlying leading theories of psychic phenomena and he offers bold criticisms of both mechanistic analyses of communication and psychophysical identity theories In addition he challenges the received view that experimental repeatability is the paramount criterion for evaluating parapsychological research and he exposes the deep confusions underlying Jung's concept of synchronicity *Psychokinesis* Stanley Krippner, 1977-11 The history of humankind cannot be charted as a steady linear upward slope but rather as a series of quantum jumps of short duration separated by plateaus of varying duration during which no progress occurred During these periods of no progress the revolutionaries who produced the preceding quantum jump pass from the scene their principles and concepts become concretized as dogma and a new establishment is born whose sacred duty is the protection of the dogma against the new revolutionaries The last quantum jump was the scientific revolution of the nineteenth century which laid the groundwork for our present technological civilization and perhaps more important also shaped our philosophical view of what is a human being Since the basis of this scientific revolution was reason logic measurement and total reliance upon the organized senses the resultant view of the person is that of an automaton functioning in a clockwork world The power of this view is evident in the advances made in medical science up until the 1950s The twin triumphs of sanitation and preventive medicine and the development of the antibiotic concept completely revolutionized the practice of medicine and by 1950 those of us in the profession were anticipating a new golden age of medicine But in fact the reality has been disaster The mechanistic view of humanity has led to more and more technological applications of ever increasing complexity and cost and ever decreasing efficiency
